Re: **Recall 13V-222 -- Pollak Ignition Switch**
Revision to Population of Vehicles Potentially Containing Defect

Dear Kelly,

This letter is to advise NHTSA of a change to the number of vehicles involved in Recall No. 13V-222. This recall affects 1243 Peterbilt vehicles in the United States, not 1274 vehicles as previously reported. Peterbilt determined that 31 of the vehicles initially included in the U.S. total should have been counted as Canadian vehicles and reported to Transport Canada. Kindly update your files to reflect the reduced U.S. vehicle count.

Please do not hesitate to contact me if you have any questions or concerns about the adjusted vehicle count.

Very truly yours,

s/ Pamela S. Tonglao
