Description of Defect :

Description of the Defect : BMW is recalling certain model year 2002-2003 325i, 325xi, 330i, 330xi sedans; 325Ci and 330Ci coupes and convertibles; 325iT and 325xiT Sports Wagons; and M3 coupes and convertibles to address a safety defect in the passenger side frontal air bag which may produce excessive internal pressure causing the inflator to rupture upon deployment of the air bag.

Updated June 11, 2018: BMW will use the "other" reporting category for removed vehicles in Quarterly Reporting as permitted in the Third Amendment to the Coordinated Remedy Order ("ACRO"), Paragraphs 45 through 49. As a condition of the ACRO, all affected vehicles will remain active, or "live", across BMW's data systems such that any search of "other" removed VINs will return an open recall status. For this reason, the Number of potentially involved vehicles in this report will remain the same.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : In the event of a crash necessitating deployment of the passenger's frontal air bag, the inflator could rupture with metal fragments striking and potentially seriously injuring the passenger seat occupant or other occupants.

Description of Remedy :

Description of Remedy Program : BMW intends to issue initial notifications to owners informing them of the safety defect in June 2013. Once replacement parts are available, estimated for July, BMW will notify owners again to contact their dealers and schedule a replacement of the passenger air bag, free of charge. Owners may contact BMW customer service at 1-800-525-7417 or email BMW at CustomerRelations@bmwusa.com.
