RE: 2005-2006 MDX & 2005 RL VSA Malfunction Safety Recall Tools Update

On March 14, 2013, Acura notified all dealers of a **Stop Sale** order and **Safety Recall** for some 2005-2006 MDX and 2005 RL units for VSA-related concerns. S/B 13-013: *Safety Recall: VSA System Unexpectedly Activates* was posted to ISIS on March 16, 2013, and contains parts, warranty and repair information related to this campaign.

Listed in the parts section are two tool kits: Service Tool Pack 1 (T/N 06324-SFE-000), which can be used 10 times before requiring replacement, and Service Tool Pack 2 (T/N 06325-SFE-000), which can be used indefinitely (note that the Terminal Removal Tool is NOT applicable to the recall repair, and should not be used).

Please do not order Service Tool Pack 2 if you have not yet done so. Acura will deploy kits to all dealerships by the middle of this week via DSO shipment; your dealership will be credited for any charges incurred by this deployment. Any dealer who has purchased a Service Pack 2 may be eligible for reimbursement if it was not charged under the campaign.
