NHTSA Recall 13V-093

IMPORTANT SAFETY RECALL NOTICE

Dear Acura TSX Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

What is the reason for this notice?

Acura has decided that a defect which relates to motor vehicle safety exists in certain 2004-2008 model year TSX vehicles. Vehicles that are located in areas that use corrosive materials for winter roads may experience rust or corrosion on the vehicle's engine electronic control unit (ECU). The driver's floor carpeting may transfer moisture and chemicals that are brought into the vehicle cabin to the ECU case, causing rust or corrosion. If excessive rust or corrosion develops, the ECU may malfunction causing the engine to stall increasing the risk of a crash.

What should you do?

Call any authorized Acura dealer and make an appointment to have your vehicle's ECU repaired and if necessary replaced **at no cost to you**. The complete process for repair may take approximately 42 minutes, while replacement may take approximately 60 minutes; however, your vehicle will need to be at the dealer for a longer period of time. We recommend that you plan to leave your vehicle for half a day to allow the dealer flexibility in scheduling.

If you are not satisfied with the service you receive from your Acura dealer, you may write to:
