2003-2004 Mazda6 and 2004 RX-8 – Front Passenger Air Bag Safety Recall 6913D

Dear Mazda Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mazda Motor Corporation has decided that a defect which relates to motor vehicle safety exists in certain 2003-2004 Mazda6 vehicles produced from January 14, 2003 through May 29, 2003, and 2004 RX-8 vehicles produced from June 25, 2003 through June 30, 2003.

If you are a recipient of this notice, your vehicle is included in this recall.

What is the problem?

On certain 2003-2004 Mazda6 and 2004 RX-8 vehicles, the inflator propellant material for the front passenger air bag may have been improperly processed, which may cause increased combustion during air bag deployment. This could create excessive internal pressure within the inflator, and the body of the air bag module could rupture and injure the vehicle occupant(s).

What will Mazda do?

Your Mazda dealer will inspect the front passenger air bag inflator and replace it if it is defective. The repair will be performed free of charge.

How long will it take?

If the inflator requires replacement, the dealer will order the new inflator and you will be provided alternate transportation free of charge until the repair is completed. The time needed for the actual repair is less than one hour.

What should you do?

Please make an appointment with any authorized Mazda dealer to have this repair completed as soon as possible. You do not need to bring this notice to the dealer, but it may assist in the check-in process.
