

July 2013

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

General Motors, based on data and information from supplier IMPCO Automotive, has decided that a defect, which relates to motor vehicle safety, exists in certain compressed natural gas (CNG) fuel systems installed by IMPCO Automotive on 2011-2013 model year CNG equipped Chevrolet Express and GMC Savana vehicles. As a result, General Motors and IMPCO Automotive are conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

I M P O R T A N T

- Your 2011-2013 model year Chevrolet Express or GMC Savana CNG equipped vehicle is involved in safety recall 13139.
- Owners who have not been contacted by General Motors concerning this recall should schedule an appointment with their Chevrolet or GMC dealer to arrange for the repairs to be completed.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The underbody shut-off solenoid connector to a CNG fuel tank may corrode and could form a high-resistance short in the connector, potentially causing overheating or a self-extinguishing flame. If there is a fuel leak or other combustible material in the vicinity, there is a risk of fire.

What will we do?

To correct this condition, improved solenoids and securing nuts will be installed for all exterior tanks and the regulator, and the 30 amp gas fuel pump fuse will be replaced with either a 7.5 amp fuse (for the four tank configuration) or a 5.0 amp fuse (for the three tank configuration). In addition, the wiring routing will be adjusted, if necessary, to eliminate any undue tension on the connector, and anti-corrosion sealing plugs will be installed into the valve body (2013 model year vehicles have these plugs already installed). This service will be performed at **no charge**. The approximate time for the actual repair can be as much as four hours per vehicle, but the wait time for your vehicle may be longer depending on how busy the dealership is.

What should you do?

General Motors will contact certain fleets directly to arrange for the performance of the required repair. If you have not already been contacted by General Motors, please schedule an appointment with your Chevrolet or GMC dealer for this repair.

Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the GM Fleet Action Center at 1-800-353-3867.

If after contacting your dealer and the Fleet Action Center, you are still not satisfied GM has done their best to remedy this condition without charge and within a reasonable time, you may wish to write the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590, or call the toll-free Vehicle Safety Hotline at 1.888.327.4236 (TTY 1.800.424.9153), or go to <http://www.safercar.gov>. The National Highway Traffic Safety Administration Campaign ID Number for this recall is 13V225.

Federal regulation requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.
