

**SAFETY RECALL N28 / NHTSA 13V-234
TRANSMISSION OIL COOLER TUBE**

Dear: (Name)

This interim notification letter is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in some **2012 and 2013 model year Jeep® Wrangler vehicles equipped with an automatic transmission.**

The problem is... The transmission oil cooler tube on your vehicle (VIN: xxxxxxxxxxxxxxxxx) may inadvertently come in contact with the power steering fluid return tube. This tube-to-tube contact could eventually cause the transmission oil cooler tube to develop a wear hole and leak. A loss of transmission fluid could cause transmission damage and if the leaking transmission fluid comes in contact with an ignition source, cause an underbody fire.

What your dealer will do... Chrysler intends to repair your vehicle free of charge (parts and labor). However, the parts required to provide a permanent remedy for this condition are currently not available. Chrysler is making every effort to obtain these parts as quickly as possible. Chrysler will contact you again by mail, with a follow-up recall notice, when the remedy parts are available.

NOTE: In the unlikely event that your vehicle develops a transmission fluid leak, bring the vehicle to your dealer for diagnosis and repair.
