

URGENT SAFETY RECALL

AUGUST 2013

Dear Isuzu Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Recently, you may have received a letter informing you that your <Year> model year Isuzu Ascender VIN <VIN>, was involved in a Special Policy. The program provided additional coverage for the driver door module if the module ever failed. We have decided to inspect the module to prevent the condition from occurring and have now included your vehicle in Safety Recall 13V-248. Please review the details of the recall below.

The manufacturer of your vehicle, General Motors, has decided that a defect, which relates to motor vehicle safety, exists in certain 2006-2007 model year Isuzu Ascender vehicles.

WHAT IS THE CONDITION?

If fluid, such as melted snow containing road salt, enters the driver's door module, it may cause corrosion that could result in a short in the circuit board. A short may cause the power door lock and power window switches to function intermittently or may stop working. A short may also cause overheating, which could melt components of the door module, producing odor, smoke or a fire. Additionally, the windows may raise or lower themselves, without user input. These conditions may occur even with the vehicle parked and the key removed. It is advised that you park the vehicle outdoors until it has been remedied.

WHAT WE WILL DO

Your Service Facility will test the driver's window and door lock switches for proper operation. If the switches function properly, your Service Facility will inspect the module, and, if necessary, install a protective coating to the door module. If the switches do not function properly, your Service Facility will install a new door module.

This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your Service Facility will need your vehicle longer than the actual service correction time of approximately 20 minutes to 1 hour and 45 minutes, depending on the repair required.
