**Subject: Safety Recall 34F6/4V
7-Speed DSG® Auto Transmission w/Tiptronic® (DQ-200 Direct-Shift Gearbox)
2013-2014 Model Year Volkswagen Jetta Hybrid**

Dear Volkswagen Owner,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Volkswagen has decided that a defect, which relates to motor vehicle safety, exists in some 2013-2014 model year Volkswagen Jetta Hybrid vehicles. Our records show that you are the owner of a vehicle affected by this action.

What is the issue?

Over time, the internal gearbox lead frame may corrode due to certain gearbox fluid additives used in original gearbox filling. If corrosion deposits collect between electrical wiring, an electrical short in the power supply may result in blown gearbox fuses and the deactivation of the gearbox hydraulic pump or mechatronic unit. The driver will immediately be alerted by a flashing gear indicator warning lamp in the instrument cluster and the vehicle will lose motive power but can coast to a stop. Loss of motive power while driving may increase the risk of a crash.

All other vehicle systems, such as the engine, steering, and brakes, etc. remain unaffected and fully operational.

What will we do?

To help identify/correct this defect, your authorized Volkswagen dealer will replace the existing synthetic gearbox oil with a new, mineral-based oil with non-corrosive additives to prevent future failure. This work will take up to three hours to complete and will be performed for you free of charge.

What should you do?

Please contact your authorized Volkswagen dealer without delay to schedule this recall repair. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.
