**Front airbag could deploy with a child in the front passenger seat.**

## **WHY DOES MY [2006] [GRAND VITARA] NEED REPAIR?**

Suzuki Motor Corporation has determined that a defect which relates to motor vehicle safety exists in certain **Suzuki [YEAR] [MODEL]** vehicles. Affected vehicles may develop an electrical circuit disconnection within the front passenger sensing system sensor mat that is built into the front passenger seat bottom cushion. In a frontal impact of significant magnitude, the front air bag will deploy - even with a child in the front seat. Air bag deployment with a child in the front passenger seat increases the risk of severe injury or death to the child. Please do not install a child restraint in the front seat and have all small passengers, such as a child who has outgrown child restraints, or a small adult, sit in the rear passenger seats until this repair is complete.
