

## Safety Recall: Electrical Interference May Cause Inadvertent Airbag Deployment

### BACKGROUND

Electrical noise caused by some vehicle systems may cause damage to the SRS control unit. In some cases, this damage may lead to spontaneous deployment of the airbags.

### CUSTOMER NOTIFICATION

Owners of affected vehicles will be sent a notification of this campaign in October 2013.

Do an **iN VIN status inquiry** to make sure the vehicle is shown as eligible.

Some vehicles affected by this campaign may be in your used vehicle inventory. These vehicles **must** be repaired before they are sold.

Should a dealership sell an unrepaired vehicle that subsequently causes injury or damage because of the recalled item, the dealership will be solely responsible to the damaged party, and will be required to defend and indemnify American Honda for any resulting claims. To see if a vehicle in inventory is affected by this campaign, do a VIN status inquiry before selling it.

### CORRECTIVE ACTION

Replace the SRS unit sub-harness with a revised part that includes a noise suppressor.

### PARTS INFORMATION

Replacement SRS unit sub-harness kits are currently on order. This bulletin will be revised once kits become available for order.

### WARRANTY INFORMATION

Once parts are available for order, this bulletin will be revised to include warranty information.
