Dear «NAME»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2007 – 2011 Dutchmen Travel Trailers and Fifth Wheels. As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

It has been decided some IOTA ITS-50R transfer switches are experiencing heat related failures when exposed to the elevated electrical loads associated with RV use in higher ambient temperatures. The failure is causing connections and wiring in the transfer switch to degrade and heat leading to elevated case temperatures and an increased risk of electrical damage to other appliances from loss of neutral in a 240V circuit. **Continued use of the vehicle without replacing the transfer switch increases the risk of a fire, personal injury, and property damage.**

***What we
will do***

Keystone representatives have been in contact with the staff at your selling dealership regarding this situation. The remedy is to replace the IOTA ITS-50R transfer switch with a different brand transfer switch supplied by Keystone. The service and parts required for this corrective action will be provided at no charge to you.
