October 28, 2014

Dear Volvo Owner,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

In December 2013, a letter was sent to eligible vehicle owners announcing a safety recall on the Oil Pressure Sensor software. Our records indicate that this important safety recall has not been completed on your vehicle. Please schedule an appointment at your local authorized Volvo retailer as soon as possible to have this important safety recall performed at no charge.

Volvo Cars of North America, LLC (Volvo) on behalf of Volvo Car Corporation, has decided that certain model year 2011-2012 S60 vehicles equipped with 5 cylinder (Engine Code 62) engines, fail to conform to Federal Motor Vehicle Safety Standard FMVSS No.101: *Controls and Displays sections S5 and S5.2.1.*

The reason for Recall R29436:

On affected vehicles, the engine oil pressure sensor is not activated in the vehicles software. If the engine oil pressure is too low, there will be no warning displayed in the Driver Information Module (DIM).

The corrective action is for your authorized Volvo retailer to perform a software upgrade on your Volvo.
