Healy Thomas

Subject: Fastec Interior side door lock recall 13E-039- Bloomer Trailers recall campaign 13V-444

Mr. Thomas,

We are contacting you in regards to email conversations with John Colvin on August 23, 2017 in regards to the recall noted above. Mr. Colvin sent me the paperwork to proceed with your requests, he has not worked inside our offices in several years. John actually works in our manufacturing plant as a supervisor. I'm not sure why he was the initial contact instead of Randy Bloomer, purchasing or myself to clear this issue and file the proper paperwork.

I have read over all of the emails and the prior paperwork and have also consulted with our purchasing department in regards to the door locks, in our notes we show that the door locks mentioned were picked up by the vendor and they were not used in any trailer units. I have consulted with our purchasing department, our manager has been with the company for 18 years and she also said they were picked up by the vendor Wesco. If you would be so kind to give me a week or so to go over everything and pull the files out of archive to see what has transpired.

What exactly have you requested that Mr. Colvin complete? This would help give me a starting place.

Thank you,

A handwritten signature in cursive script that reads "Kim Bloomer".
