Permit No. 919

# URGENT SAFETY RECALL NOTICE

## WHY DOES MY 2006 GSX-R1000K6 NEED REPAIR?

Suzuki has determined that after a long-term service life without changing the brake fluid, the brake fluid can deteriorate and absorb moisture which may lead to corrosion of the brake master cylinder piston. This condition causes gas to be generated in the master cylinder, which can reduce fluid pressure transmission to the front brake and affect braking power. Over time, the front brake lever may develop a “spongy” feel and stopping distances may be extended, increasing the risk of a crash.

## SUZUKI WILL REPAIR YOUR VEHICLE FREE OF CHARGE (PARTS AND LABOR).

Your dealer will replace the front brake master cylinder and flush the brake hydraulic system of old brake fluid. The brake hydraulic system will then be refilled with fresh brake fluid and bled to remove any air. This procedure will take approximately two hours to complete. Parts are available now, and there will be no charge to you for any recall service-related parts or labor.

## HOW DO I SCHEDULE MY FREE REPAIR? YOUR BEST OPTION

Simply call your Suzuki Recall Resolution Specialist at

**1-844-597-6530**

Monday through Friday, 8 AM to 7 PM EST and we'll get you scheduled for this free repair at a time that is most convenient for you.
