MACK/CXU/2014-2015

Mfr's Report Date: April 17, 2014

NHTSA Campaign Number: 14V-207

Components:

SERVICE BRAKES, AIR

Potential Number of Units Affected: 490

Problem Description:

Mack Trucks Inc. (Mack) is recalling certain model year 2014-2015 CXU trucks manufactured February 1, 2013, through January 27, 2014, and equipped with a vertical wet tank (aka supply air tank) for the brake system. The pressure relief valve may not have been installed in the tank during manufacturing.

Consequence:

Without a pressure relief valve, the air tank could rupture from being overpressurized increasing the risk of injury.

Remedy:

Mack will notify owners, and dealers will install a pressure relief valve in the air tank, free of charge. The recall will begin by mid-June 2014. Owners may contact Mack customer service at 1-866-298-6586. Mack's number for this recall is SC0380.

Notes:

Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to www.safercar.gov.
