Problem Description:

Chrysler Group LLC (Chrysler) is recalling certain model year 2011-2013 Jeep Wrangler vehicles manufactured February 16, 2010, to July 19, 2013. Corrosion in the exterior heated power mirror electrical connector may result in an electrical short.

Notes:

Also, copies of all notices, bulletins, dealer notifications, and other communications that relate to this recall, including a copy of the final owner notification letter and any subsequent owner follow-up notification letter(s), are required to be submitted to this office no later than 5 days after they are originally sent (if they are sent to more than one manufacturer, distributor, dealer, or purchaser/owner).

Your 573 states that owner notification will begin roughly 58 days after your notification to NHTSA of this issue. Please be reminded that it is required that all owners be notified of a safety defect in their vehicles within 60 days of a manufacturer's notification to NHTSA of a safety defect in those vehicles.

As stated in Part 573.7, submission of the first of six consecutive quarterly status reports is required within one month after the close of the calendar quarter in which notification to purchasers occurs. Therefore, the first quarterly report will be due on, or before, 30 days after the close of the calendar quarter.
