Part 573 Report

Date: February 3, 2014

This report serves as notification by **Four Wheel Campers, Inc. & Six-Pac Campers, Inc.** to the National Highway Traffic Safety Administration (“NHTSA”) that a motor vehicle safety-related issue exists in certain truck campers locks supplied by Fastec Industrial Corp., a division of WESCO Distribution, Inc., for installation in the doors of Recreational Vehicles (“RVs”). Additional information concerning the recalled locks can be found in Fastec’s Part 573 Report that was separately filed on July 11, 2013 with an assigned NHTSA Recall #13E039.

Importer/Distributor: Fastec Industrial Corp.
2219 Eddie Williams Rd
Johnson City, TN 37601

Manufacturer: Zhongshan Huafeng Locks Co., Ltd.
South of Yongning Industrial Avenue

Xiaolan Town, Zhongshan, Guangdong
People's Republic of China

II. Identification of the Recall Population and Its Size

Type of Equipment:

The product consists of certain truck camper locks with a keyed paddle handle and deadbolt (the “locks”) installed in the doors of RVs. Only FIC locks that have an integrated deadbolt are affected by this recall. The RVs potentially affected by the recall are as follows:

Brand:

Model No's:

Model years: January 2006 – April 2013.

Body Style/Type:

Total Product Sold:

Four Wheel Campers, Inc. & Six-Pac Campers Inc. sold a total of 2,453 truck campers with an FIC deadbolt lock between January 1, 2006 and April 2013. This total includes locks with any key code, not just the subset of 20 key codes that may be affected by the recall.

Current Inventory Estimates:

Four Wheel Campers, Inc. & Six-Pac Campers, Inc. has reviewed its current inventory of truck campers and has replaced all potentially affected locks in its inventory.

III. Description of Issue and Type of Hazard

In or about December 2013, NHTSA notified **Four Wheel Campers, Inc & Six-Pac Campers, Inc.** that Fastec intended to initiate a recall of the potentially affected locks due to a potential jamming issue with the deadbolt cylinder. If a lock is affected, the key may be able to be removed from the locked door when the key in the deadbolt cylinder is in the horizontal 9 o'clock position, potentially jamming the deadbolt and potentially causing the red lever on the interior side of the lock to become inoperable. In that event, a person inside the truck campers may not be able to unlock and open the main RV door, but he or she could still exit the truck camper from the emergency exit.

IV. The Remedy Program and Its Schedule

Upon approval of the proposed recall and the recall announcement, **Four Wheel Campers, Inc & Six-Pac Campers, Inc.** will work with Fastec to notify consumers of the recall. **Four Wheel Campers, Inc & Six-Pac Campers, Inc.** estimates that it will issue consumer notifications in the fourth quarter of 2013. **Four Wheel Campers, Inc & Six-Pac Campers, Inc.** will coordinate the recall efforts with Fastec and will refer consumers to Fastec for free replacement of the cylinders in any affected locksets as described more fully in Fastec's Part 573 Report.
