Re: Keystone RV Company
Defect and Non-Compliance Report

Dear Ms. Lewis:

Keystone RV Company ("Keystone") has decided that a defect which relates to motor vehicle safety exists in the recreational vehicles listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Reports.

A. Recall Population and Vehicle Identification.

Product Brands	Number of Vehicles
----------------	--------------------

2014 Dutchmen Infinity Models 3210RE, 3610RL, 3710BH Fifth Wheels:

VIN Ranges:

47CFNFS25EC664652 - 47CFNFU25EC665104

4YDF36123EZ960000 - 4YDF36124EZ960037

Production Dates: 8/1/2013 - 4/3/2014

Total number of vehicles subject to this campaign is: 101

B. Description of Defect. It has been decided that on the vehicles listed above the interior steps need additional support added for the leading edge of the step. A step that fractures during use may cause a person to fall leading to an increased risk of person injury.

C. Basis for Determining that a Defect Exists.

April 11, 2014 - Keystone received a report of a person that fell as a result of the step breaking. An investigation was initiated into the cause of the step failure.

April 28, 2014 – It was decided that the amount of overhang on the step could cause the step to break under high stress circumstances.

D. Remedying of Defect. Keystone will notify owners, and dealers will install a brace kit for the step, free of charge.
