**Chronology :**

In mid August 2014 the Western Star Manufacturing plant questioned the brake configuration of a vehicle being built. DTNA Engineering determined that the vehicle should be equipped with an ABS brake system. DTNA immediately began an investigation to determine why the vehicle did not have an ABS brake system and to determine if any other vehicles that should have ABS brake systems were built without them. At the end of August 2014 DTNA decided to conduct a voluntary safety recall on certain Western Star vehicles without ABS brake systems.
