VIN (Vehicle Identification Number) Range

Begin : 4YDT32025FK600718

End : 4YDT32023FK601480

 Not sequential VINs**Description of Defect :**

Description of the Defect : It has been decided a 12V mini breaker is located too close to the propane cylinder.

Description of the Safety Risk : If the propane cylinder rubs against the rubber boot it may wear through and cause a short leading to an increased risk of fire and personal injury.

Description of the Cause : The breaker had been relocated due to interference with towing equipment. The relocation put the breaker too close to the propane cylinder.

Identification of Any Warning that can Occur : The propane cylinder may have a mark on it from contact with the breaker.

Supplier Identification :**Component Manufacturer**

Name : NR

Address : NR

NR

Country : United States

Chronology :

10/16/2014 A transport company notified us that a propane cylinder had contacted the breaker.
10/23/2014 After investigation it was determined that the breaker had been moved and subsequently the propane tray had been shifted closer to the breaker.

Description of Remedy :

Description of Remedy Program : The dealer will relocate the breaker away from the propane cylinder. The parts and service required for the corrective action will be provided at no charge to the owner.

How Remedy Component Differs from Recalled Component : The breaker will be located in a position so the propane cylinder cannot contact it.

Identify How/When Recall Condition was Corrected in Production : 10/17/2014 All Laredo Travel Trailers at the manufacturing facility were corrected by moving the breaker.

Recall Schedule :

Description of Recall Schedule : Keystone will notify the dealers and owners of the recreational vehicles by letter. A final copy of the owner letter will be provided to NHTSA, along with the dealer repair procedures.

Planned Dealer Notification Date : NOV 10, 2014 - NOV 10, 2014

Planned Owner Notification Date : NOV 10, 2014 - NOV 10, 2014
