

## Recall Letter sent to USA Dealers

### Safety Recall Notice

Dear Open Range R.V. Dealer:

Open Range R.V. has decided that a defect which relates to motor vehicle safety exists in Open Range/Light, 2014 5<sup>th</sup> Wheel trailer model # LF319RLS model bearing production dates starting 12/16/2013 through 03/18/2014 are affected.

Open Range R.V. has determined that these units may lack the proper length of gas line to allow the slide out room to function properly and present any undue stress on the LP gas line. This condition could lead to a gas line leak or cause the gas line to be kinked and restrict the flow of gas through the gas line.

Open Range R.V., is conducting a safety recall campaign to inspect and, where necessary correct this issue. Accordingly, Open Range R.V. will contact you soon to provide you with a VIN list of potentially affected vehicles that have been delivered to your dealer location, along with inspection/remedy instructions for units in your inventory and units that are brought in by vehicle owners.

In the meantime, please ensure that the model LF319RLS's on your lot are not used until they have been inspected and, as necessary, repaired.

It is a violation of Federal law to deliver the recalled equipment and/or vehicles containing this equipment; under sale of lease until this defect has been remedied. Accordingly, no unit should be delivered to customers until it has been inspected and, where necessary, corrected.

If you have any questions about this recall, you may contact Open Range R.V.'s recall division at (260)768-7771 or via e-mail at [warranty-support@openrangerv.com](mailto:warranty-support@openrangerv.com).

We apologize for the inconvenience, but are certain you share our concern for the safety and satisfaction of our customers.

Sincerely,

Russ Draper, Director of Warranty/Parts/Service
