

To: All Toyota Dealer Principals, Service Managers, and Parts Managers

Subject: Safety (Noncompliance) Recall E0X – **Remedy Notice (Phase 1 & 2)**  
Certain 2008 through 2014 Model Year Tacoma and FJ Cruiser Vehicles  
Tire and Loading Information Label – TRD Accessory Wheels and Toyota-recommended Light Truck Tires

As previously announced on August 4, 2014, Toyota filed a Noncompliance Information Report (NCIR) with the National Highway Traffic Safety Administration (NHTSA) informing the agency that certain 2008 through 2014 model year Tacoma and FJ Cruiser vehicles equipped with TRD Accessory Wheels and Toyota-recommended Light Truck (LT) tires do not conform to the requirements of Federal Motor Vehicle Safety Standard (FMVSS) 110: Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information. **As a result, applicable new vehicles in dealer inventory must not be delivered until the Safety (Noncompliance) Recall is corrected.**

**Toyota has completed remedy preparations for Phase 1 & 2 and will begin notifying these owners.**

Phase	Model Name	Model Year	Status	Remedy Date
1	Tacoma	Certain 2008 through 2014	Remedy	Late August, 2014
2	FJ Cruiser		Remedy	Early September, 2014

## **Condition**

The above listed vehicles equipped with TRD Accessory Wheels and Toyota-recommended Light Truck (LT) tires could have an overlay label installed on the original Tire and Loading Information label with an incorrect cold tire pressure inflation value for the spare tire. If these wheels and tires were installed on a vehicle prior to first retail sale with this incorrect label, the vehicle fails to meet the requirements of FMVSS 110: Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information. A tire inflated to the improper tire pressure could increase the risk of a crash.

## **Remedy**

Toyota dealers will inspect vehicles equipped with TRD Accessory Wheels and Toyota-recommended LT tires and install an updated overlay label if needed. Dealers will also check the tire pressure in all tires and reset the Tire Pressure Monitoring System (TPMS), if applicable, at **NO CHARGE** to the vehicle owner. Please refer to TIS for repair procedure information.

Please note that owners of included Tacoma vehicles can complete the remedy without visiting a Toyota dealer if they so choose.

Additional details are provided in the Owner Letter Mailing section below.

**This following information is being provided to inform you of the owner notification and your degree of involvement.**

### **1. Owner Letter Mailing Details and Date**

**The remedy will be launched in two phases.** Toyota estimates the subject TRD Accessory Wheels and LT Tires were installed on approximately 20,000 Tacoma and FJ Cruiser vehicles at Vehicle Processing Centers and Toyota dealers, or sold over the counter to customers. These vehicles could have an overlay label with an incorrect cold tire pressure inflation value for the spare tire installed on the original Tire and Loading Information label. In order to assure that the owners of vehicles equipped with these accessory wheels and LT tires involved in this Safety (Noncompliance) Recall are notified, it will be necessary to notify owners of approximately 449,000 total vehicles. Please see the information below on the different types of owner notification Toyota will be sending:

(Owner Letter Mailing continued . . .)

### **Tacoma Vehicles – Phase 1**

Owners of vehicles included in Phase 1 will begin receiving a Safety (Noncompliance) Recall Notification by first class mail in late September, 2014. Toyota will be sending two different notices to owners of Tacoma vehicles; please see the following for additional information.

- 1) Owners of vehicles known to have these accessory wheels and LT tires installed by Toyota prior to first retail sale will receive an updated Tire and Loading Information overlay label with their notification. Owners will be instructed to install the updated overlay label. In addition, they will be asked to check the tire pressure in all tires and reset the TPMS as needed. This will complete Safety (Noncompliance) Recall E0X for these vehicles.
- 2) Owners of vehicles which *may* be equipped with these accessory wheels and LT tires, but for which Toyota does not have definitive information, will receive a notification with inspection information. This notification will include a pre-paid postcard requesting the vehicle owner to identify whether or not the vehicle had these accessory wheels and LT tires prior to first retail sale.

If equipped, Toyota will send a follow-up letter with the updated Tire and Loading Information overlay label to owners that indicate they had these accessory wheels and LT tires. Owners will be instructed to install the updated overlay label. In addition, they will be asked to check the tire pressure in all tires and reset the TPMS as needed. This will complete Safety (Noncompliance) Recall E0X for these vehicles.

### **FJ Cruiser Vehicles – Phase 2**

Owners of vehicles included in Phase 2 will begin receiving a Safety (Noncompliance) Recall Notification by first class mail in early October, 2014.

FJ Cruiser owners will receive a notification with inspection information. This notification will include a pre-paid postcard requesting the vehicle owner to identify if the vehicle did not have these accessory wheels and LT tires prior to first retail sale. Upon receipt of the postcard, Toyota will complete Safety (Noncompliance) Recall E0X for these vehicles, because they are not equipped with the subject accessory wheels and LT tires.

If equipped, due to multiple spare wheel and tire configurations with different labels, the notification will ask owners to make an appointment with a Toyota dealer to have the appropriate updated overlay label installed. The dealer will also check the tire pressure in all tires and reset the TPMS, if applicable, at **NO CHARGE**.

If a vehicle owner requires assistance performing the inspection or overlay label installation, any authorized Toyota dealer will assist at **NO CHARGE**.

*Toyota makes significant effort to obtain current customer name and address information when mailing owner letters. In the event your dealership receives a notice for a vehicle that was sold prior to the Safety Recall announcement, it is the dealership's responsibility to forward the owner letter to the customer who purchased the vehicle.*

Please note that only owners of the covered vehicles will be notified. If a dealer is contacted by an owner who has not yet received the notification, please **verify coverage by confirming through TIS**.

**2. New Vehicles in Dealership Inventory**

Under Title 49, Section 30112(a) of the United States Code, a dealer cannot sell, offer for sale, or introduce or deliver for introduction in interstate commerce a new motor vehicle when it is aware that the vehicle does not comply with an applicable Federal Motor Vehicle Safety Standard. In addition, 49 Code of Federal Regulations §577.13 requires us to provide the following advisory: It is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect or noncompliance is remedied.

Vehicle Safety Recall completion should always be verified through TIS. We request your assistance to ensure involved vehicles are identified and not delivered prior to performing the remedy.

**3. Inspection Reminder Mirror Hang Tags for Covered Vehicles**

To easily recognize vehicles involved in this Safety Recall, each dealership should utilize Inspection Reminder Hang Tags. Inside the vehicle’s glove box are stickers containing the VIN. Apply one of these stickers to the hang tag and install the hang tag in the vehicle. A sample copy of the Inspection Reminder Hang Tag has been included for your reference.

Note: Dealerships can order Hang Tags from the Material Distribution Center (MDC).

Part Number	Description	Qty.
00411-140003	Inspection Mirror Hang Tag	(25 Per Pack)

**4. Pre-Owned Vehicles in Dealer Inventory**

Toyota requests that dealers do not deliver any pre-owned vehicles in dealer inventory that are covered by a Safety Recall unless the Noncompliance has been remedied.

**5. Number and Identification of Covered Vehicles**

Toyota estimates that approximately 20,000 (certain 2008 through 2014 model year) Tacoma and FJ Cruiser vehicles were equipped with TRD Accessory Wheels and Toyota-recommended LT tires prior to first retail sale. These vehicles could have an overlay label with an incorrect cold tire pressure inflation value for the spare tire installed on the original Tire and Loading Information label.

In order to assure that the owners of vehicles equipped with TRD Accessory Wheels and Toyota recommended LT tires involved in this Safety (Noncompliance) Recall are notified, it will be necessary to notify owners of approximately 449,000 total vehicles.

Model Name	Model Year	Appx. UIO
Tacoma	Certain 2008 through 2014	408,000
FJ Cruiser		41,000

Owners of vehicles known **not** to be equipped with TRD Accessory Wheels and Toyota-recommended LT tires at the time of first retail sale will not receive notices.

**6. Parts Ordering**

Most vehicles are not equipped with these accessory wheels and LT tires and will not require an updated overlay label. Additionally, owners of Tacoma vehicles known to have these accessory wheels and LT tires installed by Toyota prior to first retail sale will receive an updated overlay label with their notification. Refer to TIS for the appropriate Technical Instructions.

New Tire and Loading Information overlay labels can be ordered through the Materials Distribution Center (MDC). Since majority of vehicles will not require a new Tire and Loading Information overlay label and to maintain sufficient supply for all dealers, the maximum order quantities have been set as follows:

Model	Old TRD Label	New TRD Label	Qty	Frequency
Tacoma	00602-35015	00602-35152	5	Weekly

Five different Tire and Loading Information Overlay Labels are available for FJ Cruiser vehicles. Please ensure the correct label is selected based on the spare wheel and tire configuration.

Model	Old TRD Label	New TRD Label	Spare Wheel Configuration	Qty	Frequency
FJ Cruiser	00602-35060	00602-35016	TRD Wheel w/ LT Tire	5	Weekly
		00602-35154	16" OE Wheel w/ P-Metric Tire 2012-2014 MY	5	Weekly
		00602-35162	16" OE Wheel w/ P-Metric Tire 2008-2011 MY	5	Weekly
		00602-35156	17" OE Wheel w/ P-Metric Tire 2012-2014 MY	5	Weekly
		00602-35165	17" OE Wheel w/ P-Metric Tire 2008-2011 MY	5	Weekly

**7. Technician Training Requirements**

The repair quality of covered vehicles is extremely important to Toyota. All dealership associates involved in the recall process are required to successfully complete E-Learning course SC13A. To ensure that all vehicles have the repair performed correctly; technicians performing this recall repair are required to currently hold at least one of the following certification levels:

- **Toyota Certified (Any Specialty)**
- **Toyota Expert (Any Specialty)**
- **Master**
- **Master Diagnostic Technician**

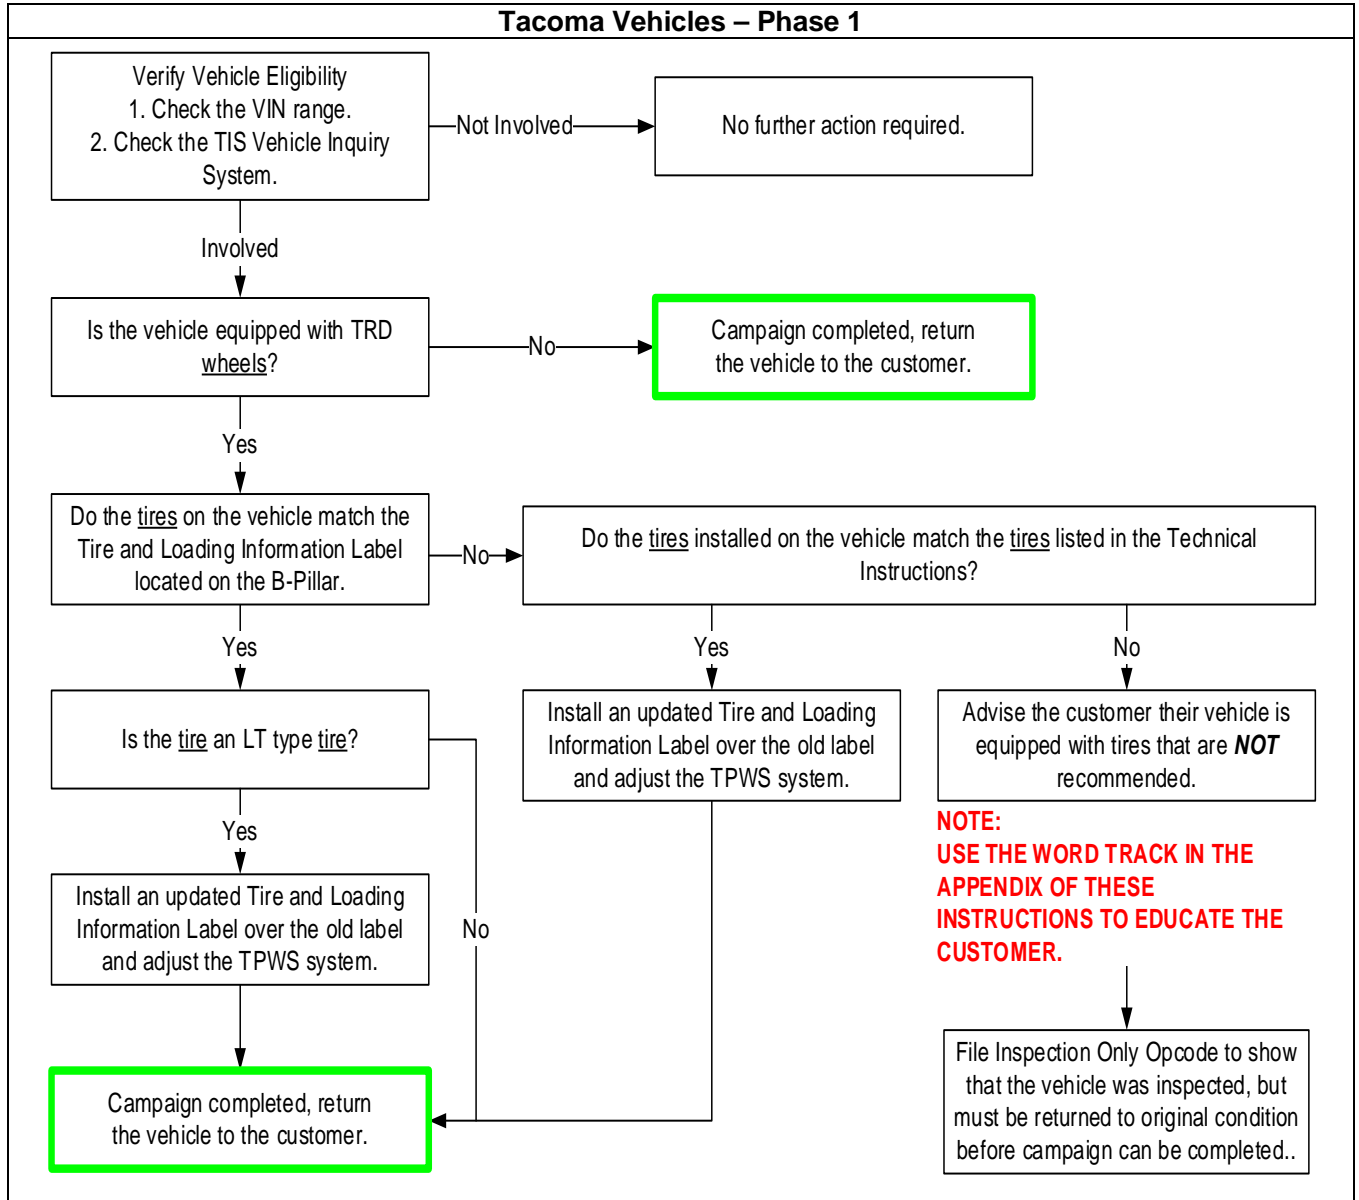

It is the dealership’s responsibility to select technicians with the above certification level or greater to perform this recall repair. Carefully review your resources, the technician skill level, and ability before assigning technicians to this repair. It is important to consider technician days off and vacation schedules to ensure there are properly trained technicians available to perform this repair at all times.

**8. Remedy Procedures**

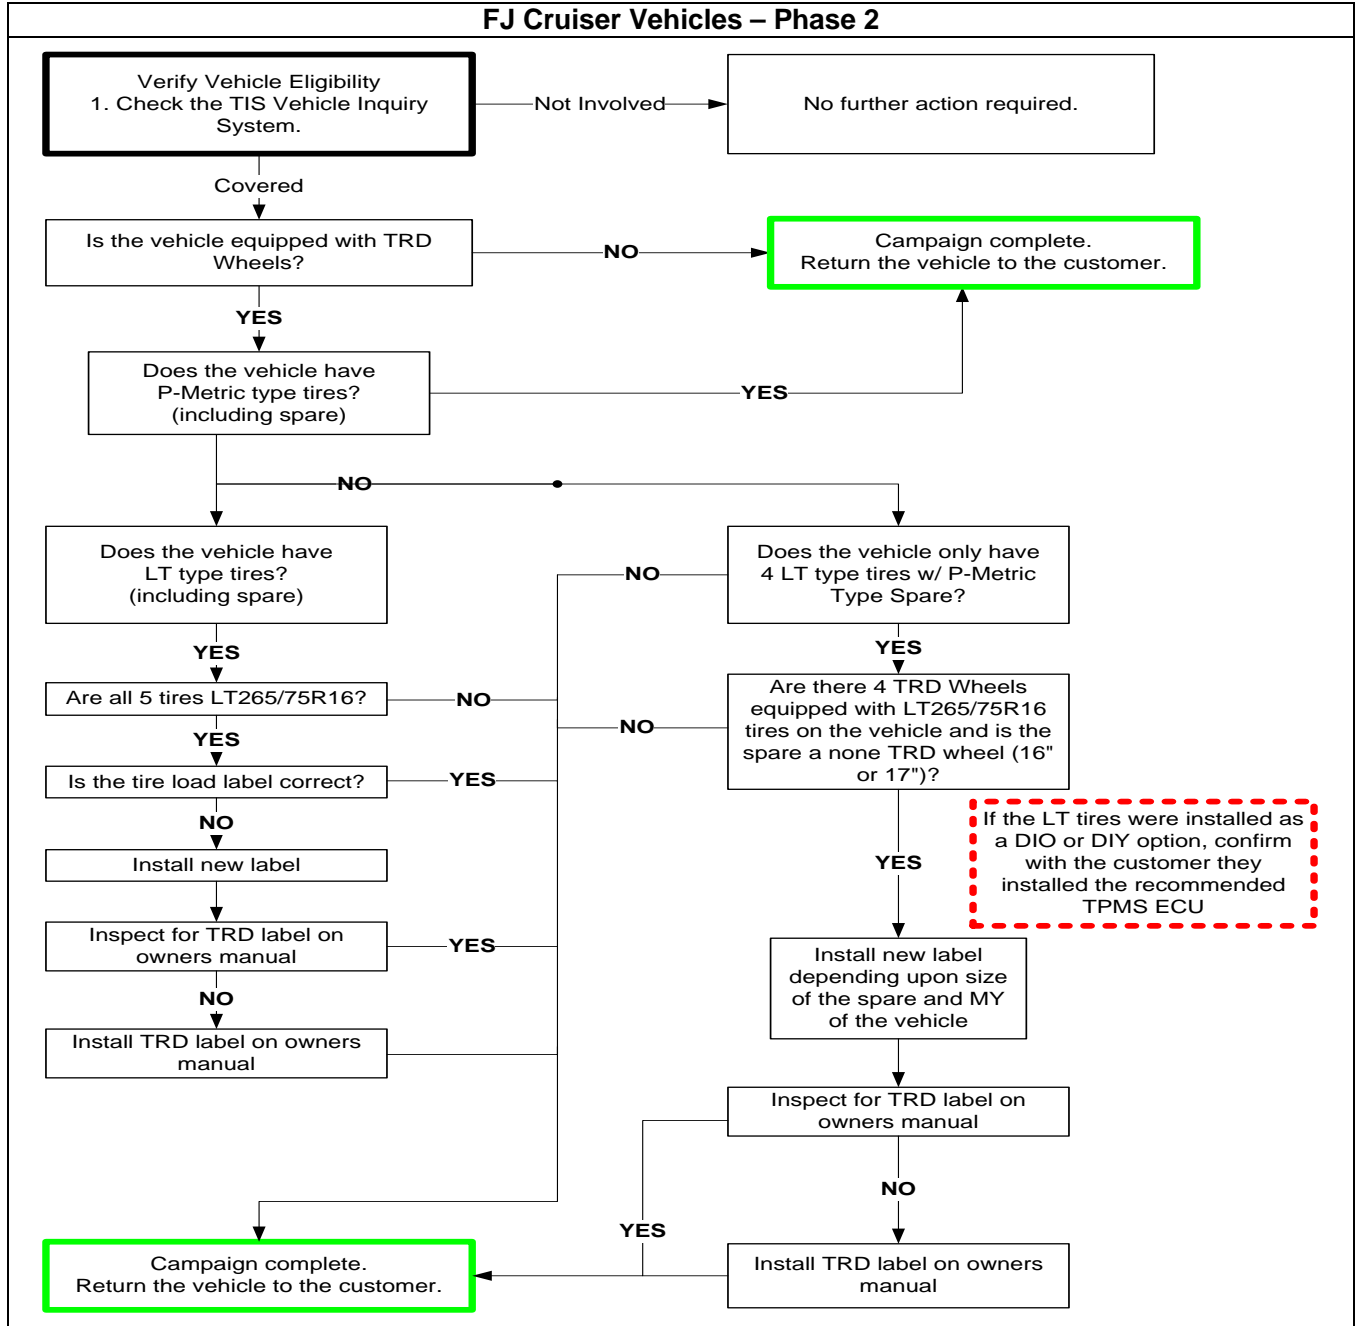

Please refer to TIS for Technical Instructions on this repair.

Conduct all applicable, non-completed Safety Recall and Service Campaigns on the vehicle during the time of appointment.

**9. Warranty Reimbursement Procedure**

(Warranty Reimbursement continued . . .)

Model Name	Op Code	Description	Flat Rate Hour
ALL	AGG90B	Not Equipped with TRD Accessory Wheels and Toyota-recommended LT Tires	0.2
	AGG90C	Inspect Vehicle - Adjust Tire Pressures, Reset TPMS and Install Tire and Loading Information Overlay Label to B-Pillar	0.3

Note: The flat rate times include 0.1 hours for administrative cost per unit for the dealership.

**Sublet:**

The Cost of the Tire and Information Loading Label can be claimed as sublet type "ZZ" at a rate of \$3.00 per vehicle under Op. Code AGG90C. The sublet cost covers the label and shipping expense.

**10. Repair Quality Confirmation**

The repair quality of covered vehicles is extremely important to Toyota. To help ensure that all vehicles have the repair performed correctly, please designate at least one associate (someone other than the individual who performed the repair) to verify the repair quality of every vehicle prior to customer delivery.

**11. Media Contacts**

If you are a dealership associate and have any questions, please contact your District Service/Parts Manager. ***In the event you are contacted by the News media***, it is imperative that all media contacts (local and national) receive a consistent message. In this regard, all media contacts must be directed to Cindy Knight (310) 468-2170 in Toyota Corporate Communications. (Please do not provide this number to customers.)

**12. Customer Contacts**

A FAQ is attached to help respond to any customer concerns. If the customer has any further questions, they are requested to contact the Toyota Customer Experience Center. The Toyota Customer Experience Center can be reached at 1-888-270-9371 Monday through Friday, 5:00 am to 6:00 pm, or Saturday 7:00 am to 4:00 pm Pacific Time.

*Please note the attached FAQ is published on the [www.Toyota.com](http://www.Toyota.com) website for customer viewing.*

***Please review this entire package with your Service and Parts staff to familiarize them with the proper step-by-step procedures required to implement this Safety Recall.***

Thank you for your cooperation.  
TOYOTA MOTOR SALES, U.S.A., INC.

**Safety (Noncompliance) Recall E0X - Remedy Notice (Phase 1 & 2)**  
**Certain 2008 through 2014 Model Year Tacoma and FJ Cruiser Vehicles**  
**Tire and Loading Information Label – TRD Accessory Wheels and Toyota-recommended Light Truck Tires**

**Customer Frequently Asked Questions**

Published Early September, 2014

**The remedy will be launched in phases due to parts availability. Toyota has completed remedy preparations for Phase 1 & 2 and will begin notifying these owners.**

Phase	Model Name	Safety Recall Status	Remedy Date
1	Tacoma	Remedy	Late August, 2014
2	FJ Cruiser	Remedy	Early September, 2014

**Q1: What is the condition?**

A1: The above listed vehicles equipped with TRD Accessory Wheels and Toyota-recommended Light Truck (LT) tires could have an overlay label installed on the original Tire and Loading Information label with an incorrect cold tire pressure inflation value for the spare tire. If these wheels and tires were installed on a vehicle prior to first retail sale with this incorrect label, the vehicle fails to meet the requirements of Federal Motor Vehicle Safety Standard (FMVSS) 110: Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information. A tire inflated to the improper tire pressure could increase the risk of a crash.

**Tire and Loading Information Label  
 Located on Driver Side B-pillar**

**Q1a: Why are only vehicles equipped with TRD Accessory Wheels and Toyota-recommended Light Truck (LT) tires prior to first retail sale covered by this Safety (Noncompliance) Recall?**

A1a: Vehicles equipped with TRD Accessory Wheels and Toyota-recommended LT tires could have a TRD overlay sticker installed on the original Tire and Loading Information label with an incorrect cold tire pressure inflation value for the spare tire. All vehicles must have the manufacturer’s recommended cold tire inflation pressure on the label required by FMVSS 110 before a vehicle is first sold to a retail purchaser. (This requirement only applies to vehicles when they are first sold; it does not apply to wheels and tires installed after first sale.)

Vehicles with wheels and tires originally installed during vehicle assembly by Toyota have the correct Tire and Loading Information label with the recommended cold tire pressure inflation value for those tires, including the spare.

**Q2: Which and how many vehicles are involved in this Safety (Noncompliance) Recall?**

A2: Toyota estimates that approximately 20,000 (certain 2008 through 2014 model year) Tacoma and FJ Cruiser vehicles were equipped with TRD Accessory Wheels and Toyota-recommended LT tires prior to first retail sale. These vehicles could have an overlay label with an incorrect cold tire pressure inflation value for the spare tire installed on the original Tire and Loading Information label.

In order to assure that the owners of vehicles equipped with TRD Accessory Wheels and Toyota-recommended LT tires involved in this Safety (Noncompliance) Recall are notified, it will be necessary to notify owners of approximately 449,000 total vehicles.

Model Name	Model Year	Appx. UIO
Tacoma	Certain 2008 through 2014	408,000
FJ Cruiser		41,000

Owners of vehicles known **not** to be equipped with TRD Accessory Wheels and Toyota-recommended LT tires at the time of first retail sale will not receive notices.

**Q3: What is Toyota going to do?**

A3: **The remedy will be launched in two phases.** In order to assure that the owners of vehicles equipped with these accessory wheels and LT tires involved in this Safety (Noncompliance) Recall are notified, it will be necessary to notify owners of approximately 449,000 total vehicles. Please see the information below on the different types of owner notification Toyota will be sending:

**Tacoma Vehicles – Phase 1**

Owners of vehicles included in Phase 1 will begin receiving a Safety (Noncompliance) Recall Notification by first class mail in late September, 2014. Toyota will be sending two different notices to owners of Tacoma vehicles; please see the following for additional information.

- 1) Owners of vehicles known to have these accessory wheels and LT tires installed by Toyota prior to first retail sale will receive an updated Tire and Loading Information overlay label with their notification. Owners will be instructed to install the updated overlay label. In addition, they will be asked to check the tire pressure in all tires and reset the TPMS as needed. This will complete Safety (Noncompliance) Recall E0X for these vehicles.
- 2) Owners of vehicles which *may* be equipped with these accessory wheels and LT tires, but for which Toyota does not have definitive information, will receive a notification with inspection information. This notification will include a pre-paid postcard requesting the vehicle owner to identify whether or not the vehicle had these accessory wheels and LT tires prior to first retail sale.

If equipped, Toyota will send a follow-up letter with the updated Tire and Loading Information overlay label to owners that indicate they had these accessory wheels and LT tires. Owners will be instructed to install the updated overlay label. In addition, they will be asked to check the tire pressure in all tires and reset the TPMS as needed. This will complete Safety (Noncompliance) Recall E0X for these vehicles.

**FJ Cruiser Vehicles – Phase 2**

Owners of vehicles included in Phase 2 will begin receiving a Safety (Noncompliance) Recall Notification by first class mail in early October, 2014.

FJ Cruiser owners will receive a notification with inspection information. This notification will include a pre-paid postcard requesting the vehicle owner to identify if the vehicle did not have these accessory wheels and LT tires prior to first retail sale. Upon receipt of the postcard, Toyota will complete Safety (Noncompliance) Recall E0X for these vehicles, because they are not equipped with the subject accessory wheels and LT tires.

If equipped, due to multiple spare wheel and tire configurations with different labels, the notification will ask owners to make an appointment with a Toyota dealer to have the appropriate updated overlay label installed. The dealer will also check the tire pressure in all tires and reset the TPMS, if applicable, at **NO CHARGE**.

If a vehicle owner requires assistance performing the inspection or overlay label installation, any authorized Toyota dealer will assist at **NO CHARGE**.

**Q3a: How long will the repair take?**

A3a: Vehicles not equipped with these accessory wheels and LT tires only require a brief visual inspection. Vehicles equipped with these accessory wheels and LT tires will require approximately 45 minutes for the inspection, installation of the updated Tire and Loading Information overly label, and any needed tire inflation adjustments and TPMS reset. However, depending upon the dealer's work schedule, it may be necessary for the owner to make the vehicle available for a longer period of time.

**Note:** Owners of included Tacoma vehicles can complete the remedy without visiting a Toyota dealer if they so choose.

**Q4: Are there any other Lexus, Toyota, or Scion vehicles covered?**

A4: No, there are no other Lexus, Toyota, or Scion vehicles covered by this Safety (Noncompliance) Recall.

However, certain 2008 through 2011 model year FJ Cruiser and Tacoma vehicles, equipped with TRD Accessory Wheels and Toyota-recommended LT tires were part of a 2011 Safety (Noncompliance) Recall (Toyota Recall# B0B) to address an improperly calibrated Tire Pressure Monitoring System (TPMS). Some of these vehicles are also included in this recall.

**Q4a: If Safety (Noncompliance) Recall #B0B was completed, am I included in this Safety (Noncompliance) Recall?**

A4a: Vehicles that received a remedy repair as part of Safety (Noncompliance) Recall #B0B could also have an overlay label installed on the original Tire and Loading Information label with an incorrect cold tire pressure inflation value for the spare tire. Toyota will send an owner notification letter by first class mail to owners of vehicles also covered by this Safety (Noncompliance) Recall.

**Q5: How can I determine the proper cold tire pressure inflation values for my vehicle?**

A5: The proper cold tire pressure inflation values can be found in the owner's manual and on the Tire and Loading Information label on the driver side B-pillar for the wheels and tires originally installed during vehicle assembly or prior to first sale by Toyota.

Furthermore, each tire on your vehicle, whether original equipment or a replacement tire, indicates the **maximum** recommended cold tire inflation pressure on the tire sidewall. It is also recommended that you check this to be sure that you do not overinflate the tire. Please contact your Toyota dealer or dealer for the manufacturer of the tire if you have any questions.

**Q5a: If my vehicle now has wheels and/or tires not supplied by Toyota, what tire inflation pressure should I use?**

A5a: There are many different types of wheels and tires that an owner might choose to replace those originally supplied and approved by Toyota. The Tire and Loading Information label may not apply to all replacement tires. You should check with your wheel or tire dealer if you have any questions.

**Q6: How does Toyota obtain my mailing information?**

A6: Toyota uses an industry provider who works with each state's Department of Motor Vehicles (DMV) to receive registration or title information, based upon the DMV records. Please make sure your registration or title information is correct.

**Q6a: Do I need my owner letter to have the remedy performed by a Toyota dealer?**

A6a: You do not need an owner letter to have this safety recall completed; however, to assist the dealer in confirming vehicle eligibility, we request that you present this notice at the time of your service appointment.

**Q6b: Do I need my updated Tire and Loading Information overlay label to have the remedy performed by a Toyota dealer?**

A6b: For owners of Tacoma vehicles that received an updated label with your notice but elect not to apply it yourself, you do not need this label to have this safety recall completed. However, in case the Toyota dealer does not have the required overlay label for your vehicle in-stock, to minimize your inconvenience, we request that you bring the label sent with your notice at the time of your service appointment.

**Q7: What if I have additional questions or concerns?**

A7: If you have additional questions or concerns, please contact the Toyota Customer Experience Center at 1-888-270-9371 Monday through Friday, 5:00 am to 6:00 pm, or Saturday 7:00 am to 4:00 pm Pacific Time.
