URGENT - DISTRIBUTE IMMEDIATELY

Date:	September 11, 2014
Subject:	Stop Delivery Order for Upcoming Safety Recall 14594
Models:	2015 Chevrolet Corvette
To:	All Chevrolet Dealers
Attention:	Dealer, Dealer Principal, General Manager, General Sales Manager, Service Manager, Parts and Service Director, New Vehicle Sales Manager

STOP DELIVERY ORDER

Effective immediately, stop the delivery of certain 2015 model year Chevrolet Corvette vehicles in new or used vehicle inventory. General Motors has notified the National Highway Traffic Safety Administration (NHTSA) about an upcoming safety recall that involves these vehicles. The GM recall number is 14594.

Until further instructions are received, certain model year 2015 Chevrolet Corvette vehicles that are in dealer new vehicle inventory must be held and not delivered to customers, dealer-traded, released to auction, or used for demonstration purposes. It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect is remedied.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2015 model year Chevrolet Corvette vehicles. If one of these vehicles is involved in a crash in which the driver air bag deploys, the module reaction plate may fracture. This fracture may allow the driver airbag's retention wire to pull through the housing, which can result in the driver air bag separating from the steering wheel. If the driver air bag separates from the steering wheel, the driver air bag may provide reduced restraint and increase the potential for occupant injury.

To correct this condition, replace the Driver Airbag Module with a revised Driver Airbag Module.

We are working with the supplier to obtain the required parts as quickly as possible. When a sufficient quantity is available, the recall bulletin will be released and dealers can begin repairing vehicles.

The Investigate Vehicle History screen in the Global Warranty Management system has been updated for this upcoming safety recall. This action has been taken to assist dealers with determining which vehicles are involved so they can properly respond to customer inquiries. Please note the "N/A" under Release Date and the "Incomplete - Remedy Not Yet Available" message under Status. This means

release of the recall bulletin is still pending and dealers should not attempt to perform any repairs at this time.

The attached file provides the Vehicle Identification Number (VIN) of the involved vehicles that have been identified as currently being in dealer new vehicle inventory. It is sorted by dealer Business Associate Code (BAC) for easy reference. Your dealership's BAC will not be listed if none of the involved vehicles are currently in your new vehicle inventory. A file identifying involved vehicles in dealer used inventory is not available.

Additional information will be provided in the near future.
