

T-REX DEALER SAFETY NOTICE

RECALL NOTICE

14V-608

TO: All Dealers,

Campagna Motors has identified a potential safety concern on some T-REX 1400R, 14R and 14RR. An official recall to address this issue is being initiated effective September 10th 2014.

On certain vehicles, the adjustable suspension can be lowered to a ground clearance that when travelling over uneven pavement, a foreign object, or under excessive load at an excessive speed, the protective skid plate can contact the road surface. This would cause the drain plug guard to be worn by multiple impacts with the road, exposing the drain bolt head. This could result in the drain bolt being damaged or pushed-in, thereby piercing the oil pan and releasing oil, which could result in a loss of control from the rear tire passing over the oil spill and increase the risk of a crash causing injury and/or property damage.

Owners will be notified by mail about the recall and will be instructed to proceed with you or a local mechanic. There is no cost to owners for this recall.

Dealers or experienced mechanics will replace the drain bolt with a differently designed flat drain bolt supplied by Campagna Motors. Instructions for the replacement are included.

Please be reminded that it is a violation of Federal law for you to sell or lease the T-Rex covered by this notification until this recall has been performed. Substantial civil penalties apply to violations of this law.

Your assistance with this recall is appreciated. Should you have any questions or concerns, please contact Ben Gillis at 450-641-2112 ext 222.
