NISSAN BULLETIN

2011-14 Nissan Juke Fuel Pressure Sensor Campaign Update – Final Repair Procedure

Reference: R1418
Date: December 23, 2014

Attention: Dealer Principal, Sales, Service & Parts Managers

******* Dealer Announcement *******

On December 12th, 2014 Nissan sent out a campaign update to communicate an interim repair procedure for this **Stop Sale** and voluntary safety recall campaign. This update is a follow up to that announcement to let dealers know that the special tool and campaign bulletin **NTB14-112** is now available. **This bulletin supersedes the interim procedure.**

******* Special Tool *******

A special tool has been developed (J-51813). The special tool is being shipped directly to each dealership. Tools should begin to arrive on December 23rd, 2014.

******* Flat Rate Time Notice *******

As previously communicated, the special service tool eliminates several steps in the process. Dealers are required to use the new claims coding and flat rate time included in the finalized campaign bulletin. Any interim repair claims submitted on repair orders opened after December 23rd will suspend. Dealers will be required to resubmit with corrected claims coding in order to receive payment and close the campaign on this vehicle.

******* Bulletin Update*******

Nissan has developed campaign bulletin **NTB14-112** containing instructions to perform this voluntary safety recall campaign. These instructions replace the procedure that was included in the previous announcement. The bulletin is now available on ASIST, Dealer360, and on NNAnet.com under My Documents in the following categories:

- Parts>Campaigns>
- Sales>Campaigns>
- Service>Campaigns>
