14KWM

Supplier

Kenworth

Description

Recall 14KWM - Trailer Stop Lamp Circuit with Undersize Wire Gauge

Release Date

12/15/2014

Introduction

Kenworth determined that a design error occurred; an undersized wire gauge was used for the trailer stop lamp circuit.

1,768 T660, T800, W900, T400, and C500 chassis (1380 U.S. and 388 Canadian) built between 9/19/2014 – 10/30/2014.

Expiration Date: This safety recall does not expire.

Situation

The smaller gauge wire could become damaged due to thermal cycling which may result in a fire. In addition, the trailer stop lamp fuse may fail more frequently causing the trailer stop lamps to be inoperable which may increase the risk of a crash.

Resolution

Replace the defective wire in the harness with the properly sized wire. See procedure attached.

It is a violation of Federal law for a dealer to sell or lease new vehicles covered by this recall until the defect or noncompliance has been corrected.

Warranty

There is no time or mileage limit for this recall. Kenworth will pay for parts at dealer net plus applicable mark-up and labor:

- **1.0 hours labor to replace defective wire (Use Quick Claim Code 14KWM).**
- **File a long claim for extraordinary circumstances (which must be explained).**

| CLAIM CODING | | | |
|-------------------|----------------------|----------------------|----|
| Failure Location: | 032-001-050 | Work Accomplished: | 69 |
| Failure Type: | 705 | Responsibility Code: | 01 |
| SRT Code: | 032-XXX 1.00 HRS. | Claim Type: | C |
