RE: Outlander Sport Front Passenger Seat Belt Lap End Attachment Fastener

ATIN NO. ATIN-14-SR-011-A

AFFECTED VEHICLES: Certain 2013 – 2015 Outlander Sport Vehicles Built July 20, 2012 – July 23, 2014

PURPOSE

A safety recall campaign will be released today for the front passenger seat belt lap end attachment fastener on certain 2013 - 2015 Outlander Sport vehicles built July 20, 2012 – July 23, 2014. **Do not deliver any affected 2013 - 2015 Outlander Sport vehicles built July 20, 2012 – July 23, 2014 until this recall has been performed.** This recall campaign will be conducted in the U.S. and Canada. The Recall Bulletin outlining the repair procedure will be available today on MEDIC and MDL.

Due to a supplier error, the front passenger seat belt lap end attachment fastener may not be torqued to specification. If the tightening torque of the fastener is too low, further loosening of the fastener due to vibrations experienced while driving cannot be excluded. If this occurs, the fastener might not withstand the required loads under all circumstances, potentially resulting in insufficient front passenger occupant restraint during a crash.

Dealers are requested to torque the fastener to specification.

Notification letters will be sent to owners of affected vehicles, requesting they contact their local Authorized Mitsubishi dealership to schedule an appointment to have this recall performed.

Affected new vehicle inventory VINs can be reviewed on the Mitsubishi Dealer Link in the **Most Recent: Open Campaign List** available under the service section of “e-reports”. Dealers must review the Warranty Superscreen to confirm if any vehicles in their new or used vehicle inventories are affected, and conduct this campaign prior to delivering them. When checking for applicability of this campaign (C1416Z), please check for and complete any other open campaigns. Always get the customer’s approval before completing a campaign on a customer owned vehicle.

IMPORTANT

Affected new or used inventory vehicles must be repaired before the vehicle is delivered. Dealers must check their inventory vehicles’ VINs on the Warranty Super Screen to verify whether the vehicle is involved in this recall campaign. It is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by the notification under a sale or lease until the defect or noncompliance is remedied.
