Date: March 26, 2014

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Terex has decided that a defect which relates to motor vehicle safety exists in the electrical connection that controls the lighting on our light tower models RL4 and AL4.

The reason for this recall....

You are receiving this bulletin because you are the owner of an affected machine.

Terex has discovered that water can enter an electrical connection that controls the lighting on the machine. When water enters the connection it can cause arcing inside the connection and disable all of the lights. **Loss of lighting in low light conditions could result in an increased risk of injury to those depending on the lights for jobsite safety.**

Continued Use Instructions:

All machine operators must be notified of these continued use requirements.

The light tower can remain in use as long as a short to the lights has not occurred. If a short has occurred, immediately remove the light tower from service. The light tower may only be returned to service after this safety notice is completed.

What we are asking you to do....

This recall requires plugging the unused pin #8 of the Deutsch connector in the control box on all affected light towers. Owners will be provided with a repair kit as well as repair instructions.

- 1 Locate all machines within the model and serial ranges referenced above within your fleet.
 - 2 Order Deustch Pin kit P/N 1254481 and install on your machine.
- Installation of the kit must take place as soon as possible but no later than 30 days from receipt of the kit.
