RE: Safety Recall P042 – Car Configuration File Latest Updates

Vehicle Affected: Range Rover

Model Year: 2014

National Highway Traffic Safety Administration Recall Number: 14V-163

Dear Range Rover Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Land Rover has decided that a defect which relates to motor vehicle safety exists in certain 2014 model year Land Rover Range Rover vehicles. Your vehicle is included in this Recall action.

What is the concern?

A limited number of 2014 model year Range Rover vehicles do not meet the requirements of Federal Motor Vehicle Safety Standard (FMVSS) 108. In the event of a front directional indicator lamp failure the required audible and visual warning, (double click/double flash warning) is not provided. The driver will not be alerted to a failure of one or both of the front directional indicators. Without a warning that a front turn signal is malfunctioning, the driver would continue to use the vehicle, unaware that other drivers on the road are not being notified that the vehicle is turning, increasing the risk of a crash.

What will Land Rover and your Land Rover Retailer do?

An authorized Land Rover retailer will update your vehicle with the latest software. There will be no charge for this repair.

What should you do?

How long will it take?

The work will be carried out as quickly and efficiently as possible in order to minimize inconvenience to customers and is expected to take approximately 30 minutes, although your retailer may need your vehicle for a longer time due to service scheduling requirements.
