

IMPORTANT SAFETY RECALL

May 2014

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect which relates to motor vehicle safety exists in some 2015 model year heavy duty Chevrolet Silverado and GMC Sierra vehicles equipped with a diesel engine and dual fuel tanks. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- This notice applies to your 2015 model year heavy duty Chevrolet Silverado or GMC Sierra vehicle equipped with a diesel engine and dual fuel tanks, **VIN** _____.
- Your vehicle is involved in GM safety recall 14067.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The fuel pipe tube nuts on each side of the diesel fuel transfer pump may not have been properly torqued. Diesel fuel may leak at the fuel transfer pump if there is fuel in the rear tank and the transfer pump activates to transfer fuel to the forward fuel tank. If there is fuel leakage and an ignition source is present, a fire could occur.

What will we do?

Your GM dealer will tighten the fuel transfer pump tube nuts. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 20 minutes.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
