Why is your vehicle being recalled?

Your vehicle has a condition in which the transmission shift cable may fracture at any time. When the fracture occurs, the driver may not be able to select a different gear, remove the key from the ignition or place the transmission in park. When the fracture occurs, the driver may not be able to select a different gear and the vehicle may move in an unintended direction, increasing the risk of a crash. If the driver cannot place the vehicle in park, and exits the vehicle without applying the park brake, the vehicle could roll away and a crash could occur without prior warning.

What will we do?

Your GM dealer will install a shift cable assembly and mounting bracket. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 1 hour and 15 minutes.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.
