Subject: NHTSA Safety Recall Number 14V-304 / Van Hool P726  
Noncompliance: Driver Seat Belt Assembly; attachment to B-pillar  
Affected units: Van Hool coach models: TX

Van Hool NV has decided that certain above-mentioned coaches fail to conform to the requirements of Federal Motor Vehicle Safety Standards (FMVSS) no. 210, "Seat Belt Assembly Anchorages". The driver seat belt assembly has not been properly secured to the B-pillar anchorage during vehicle assembly. If not properly secured, the anchorage, attachment hardware, and attachment bolt do not meet the strength requirement outlined in FMVSS 210. A seat belt that is not properly secured to its anchorage could increase the risk of injury to an occupant in the event of a crash.

The remedy is to replace the attachments on the B-pillar at no charge to you, the owner. For more details see the service bulletin SB1266. Please contact ABC Bus Inc. our designated agent in the United States to schedule to have the recall performed and to ensure that parts are available. For arrangements, additional information, or if you do not operate any of the above coaches, please contact us at:
