[REDACTED]

Subject: Safety Recalls EQ 14-004

Dear [REDACTED],

On November 1, 2013 Indiana Mills and Manufacturing Inc. ("IMMI") determined that a potential noncompliance with Federal Motor Vehicle Safety Standard (FMVSS) 209 existed in certain seat belt assemblies that are equipped with L9 seat belt buckles. These seat belt assemblies were sold to numerous customers as items of original equipment. IMMI furnished this notification to the National Highway Traffic Safety Administration. In some instances, these seat belt assemblies are difficult to unfasten. IMMI has received no report of accidents or injuries associated with this noncompliance.

[REDACTED] of these seat belt assemblies were sold to [REDACTED] and installed on [REDACTED] seat belt assemblies on each bus (Bus Stock #s [REDACTED]). Because the belts are potentially non-compliant and to follow the Federal Motor Vehicle Safety Standard regulations, Alliance Bus Group will replace the [REDACTED] seat belt assemblies.

I will contact you to schedule the service at your convenience. Please call me if you have any questions or concerns.

Sincerely,

Frank Rousu
Sales Executive
