IMPORTANT SAFETY RECALL

November 2014

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Previously, you were notified that your 2013 model year Cadillac ATS 4 door vehicle was involved in GM recall 14171. This letter is to inform you that parts are now available to repair your vehicle.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2013 model year Cadillac ATS 4 door vehicles. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- This notice applies to your 2013 model year Cadillac ATS 4 door vehicle, **VIN:** _____.
- Your vehicle is involved in GM safety recall 14171.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

Your vehicle may have a condition in which the front outboard lap belt pretensioner cables will retract upon deployment to pull in seat belt webbing, as intended, but may not lock in that position, allowing the cable and the retracted webbing to return to their original positions under occupant loading. If this occurs, there may be an increased risk of occupant excursion in frontal and rollover impacts, which increases the risk of injury to an occupant.

What will we do?

Your GM dealer will replace both front outboard lap belt pretensioners. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 45 to 60 minutes.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.
