November 12, 2014

On [REDACTED] PJ's Truck Bodies sold a truck to [REDACTED] in which you purchased. The vin number of the truck is [REDACTED]. We have been advised that there could possibly be a problem with a Muncie Power Products pressure switch.

Muncie Power Products, has sent out a letter which I have attached detailing that there could possibly be a problem with the pressure switches diaphragm, and it could become brittle depending on the equipment operation and time in service. If the diaphragm becomes brittle, the transmission fluid could seep thru the construction screw thread on the side of the switch and could possibly cause a fire.

Muncie has replacement parts that are available in a kit form to relocate the switch with an alternative diaphragm and tube assembly, at no cost to you. If you would like for the replacement parts to be installed on this vehicle, please contact me at your earliest convenience, so that we can make arrangements to install the kit, on your vehicle.

I apologize for any inconvenience that this may cause. Should you decide that this is not a problem you wish to address please advise me. My email address is pam@pjstruckbodies.com. I can also be reached at 910-892-5286.

Thank you, and we appreciate your business.

A handwritten signature in black ink that reads "Pamela G. Faircloth".

Pamela G. Faircloth
