

## IMPORTANT SAFETY RECALL

P52 / NHTSA 14V-529

This notice applies to your vehicle (VIN: xxxxxxxxxxxxxxxxxxxx).

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in certain **2013 through 2014 model year Dodge Viper vehicles**.

***The problem is...*** Some Dodge Viper vehicles may experience an incorrect airbag deployment velocity due to inaccurate seat track position sensor gap. Incorrect airbag deployment velocity may increase the chance of occupant injury during certain crash conditions.

***What your dealer will do...*** Chrysler will repair your vehicle free of charge (parts and labor). To do this, your dealer will measure the seat track position sensor gap to the detection plate bracket. Sensors found with an excessive gap must have a detection plate shim installed. The procedure will take about 1 hour to complete. However, additional time may be necessary depending on service schedules.

***What you must do to ensure your safety...*** Simply contact your Chrysler, Jeep, or Dodge dealer right away to schedule a service appointment. Please bring this letter with you to your dealer.

***If you need help...*** If you have questions or concerns which your dealer is unable to resolve, please contact the Chrysler Group Recall Assistance Center at 1-800-853-1403.
