- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

Some of these vehicles were built with a contamination within the chassis electronic module. This contamination can cause an electrical short in the module. If the module experiences an electrical short, the vehicle could display a check engine light, stall, or fail to start. If the vehicle is equipped with a trailer brake, the vehicle could lose trailer brake function and display a "Service Trailer Brake System" indicator. If the vehicle experiences this condition and stalls while in motion, there could be an increased risk of a vehicle crash.

What will we do?

Your GM dealer will replace the chassis electronic module on all affected vehicles. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 35 minutes to 1 hour and 15 minutes.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.
