

IMPORTANT SAFETY RECALL**P60 / NHTSA 14V-634**

This notice applies to your vehicle (VIN:XXXXXXXXXXXXXXXXXX).

This interim notification letter is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in certain **2011 through 2014 model year Dodge Challenger, Dodge Charger, Dodge Durango, Chrysler 300 and 2012 through 2014 model year Jeep® Grand Cherokee vehicles equipped with a 160 amp alternator.**

The problem is... The alternator diodes in your vehicle may experience a rapid failure. Variability in the failure mode ranges from no output, reduced output, and/or a fully shorted to ground condition. Depending on the alternator failure mode and timing, vehicle electrical system voltage may drop to critical levels, disabling systems such as Antilock Brake System (ABS), Electronic Stability Control (ESC), Electronic Control Module (ECM), and/or the Central Body Controller (CBC). The driver will have limited or no detection of the alternator failing, which can result in vehicle shutdown while driving and/or an underhood electrical fire.

What your dealer will do... Chrysler intends to repair your vehicle free of charge (parts and labor). However, the parts required to provide a permanent remedy for this condition are currently not available. Chrysler is making every effort to obtain these parts as quickly as possible. Chrysler will contact you again by mail, with a follow-up recall notice, when the remedy parts are available.

What you must do to ensure your safety... Once you receive your follow-up notice in the mail, simply **contact your Chrysler, Jeep or Dodge dealer** right away to schedule a service appointment.
