

IMPORTANT SAFETY RECALL

P65 / NHTSA 14V-635

This notice applies to your vehicle (VIN: xxxxxxxxxxxxxxxxxxxx).

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in certain **2010 through 2014 model year RAM trucks** equipped with a 6.7L Cummins Turbo Diesel engine.

The problem is... The diesel fuel heater electrical connector on your truck may overheat and cause a fuel leak. The diesel fuel heater housing at the fuel heater electrical connector may overheat, leading to the failure of the O-rings that seal the male electrical terminals in the diesel fuel filter/heater assembly. A leaking diesel fuel filter/heater could cause underhood smoke and/or an engine compartment fire.

What your dealer will do... Chrysler will repair your vehicle free of charge (parts and labor). To do this, your dealer will replace the diesel fuel heater electrical connector and inspect/replace the diesel fuel filter/heater assembly as required. The work will take up to 1.5 hours to complete. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety... Simply contact your Chrysler, Jeep, Dodge or RAM dealer right away to schedule a service appointment. Ask the dealer to hold the parts for your vehicle or to order them before your appointment. **Please bring this letter with you to your dealer.**

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact the Chrysler Group Recall Assistance Center at 1-800-853-1403.
