### Safety Recall J047: SEATBELT TENSION SENSOR CONNECTOR WIRING

Vehicle Affected: Jaguar F-TYPE

Model Year: 2014 - 2015

National Highway Traffic Safety Administration Recall Number: 14V-714

#### Dear Jaguar Owner:

This notice is sent to you in accordance with the requirements of the Federal Traffic and Motor Vehicle Safety Act. Jaguar has decided that a defect which relates to motor vehicle safety exists in 2014 and certain 2015 model year Jaguar F-TYPE vehicles.

Your vehicle is included in this Recall action.

#### What is the concern?

The seatbelt assembly harness connector which connects the Seatbelt Tension Sensor to the Occupant Classification Sensor Control Module (OCSCM) may not be correctly wired.

The occupant classification system will transmit a signal which does not indicate the installation of a child seat or the presence of a small person. In the case of a child seat being fitted, the occupant classification system will not disable the passenger airbag, if a small person is present in the passenger seat the passenger airbag deactivation indicator (PADi) will indicate that the seat is not occupied and the Supplementary Restraint System (SRS) will not deploy if required.

In the event of a vehicle crash the passenger side SRS may not provide the required level of occupant protection increasing the risk of occupant injury.

#### What will Jaguar and your Jaguar Retailer do?

Jaguar is carrying out a recall of the vehicles mentioned above. An authorized Jaguar retailer will correct the harness connector wire configuration.

There will be no charge for this repair
