

IMPORTANT SAFETY RECALL

P77 / NHTSA 14V-796

This notice applies to your vehicle (VIN: xxxxxxxxxxxxxxxxxxxx).

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in certain **2005 model year Dodge RAM trucks**.

The problem is... **The rear axle pinion nut on your truck may have been built without an adhesive patch on the pinion nut threads. The lack of this adhesive patch could allow the rear axle pinion nut to loosen and/or the rear driveshaft to separate from the rear axle. A loose pinion nut could cause the rear axle to seize and a separated driveshaft could cause a loss of motive power. Either situation could cause a crash without warning.**

What your dealer will do... **Chrysler will repair your vehicle free of charge (parts and labor).** To do this, your dealer will inspect the rear axle pinion nut for looseness. Rear axles found with a loose pinion nut and/or a seized up axle assembly must be reconditioned. Axles found with a pinion nut that has not loosened will have a pinion nut retainer installed. The work will take up to six hours to complete. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety... Simply **contact your Chrysler, Jeep, Dodge or RAM dealer** right away to schedule a service appointment. Ask the dealer to hold the parts for your vehicle or to order them before your appointment. **Please bring this letter with you to your dealer.**

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact the Chrysler Group Recall Assistance Center at 1-800-853-1403.
