

DATE: June 1, 2015

TO: Dealer Principal, General Manager, Service Directors, Service Managers, Training Coordinators, Warranty Administrators, and Service Technicians

SUBJECT: Safety Recall (P36) Technical Advisory – Tech Tube Enrollment

FCA Performance Institute has created a Tech Tube (**course code TT06003**) to support the release of the Technical Advisory for Safety Recall P36 – Sun Visor Wiring . This recall involves 2011 through 2014 model year Dodge Durango (WD) and Jeep Grand Cherokee (WK) vehicles.

To help ensure repairs are performed correctly as outlined in this Tech Tube, your technicians have been automatically enrolled in this brief 4 minute video course. Please encourage your technicians to watch the **P36 Safety Recall Technical Advisory** video, which can be launched from the Self Studies section of their Learning Center home page.

TT06003 P36 Safety Recall Technical Advisory provides detailed instructions on how to properly route the visor wiring harness to prevent the risk of an electrical short or potential fire.

It is the goal of FCA Performance Institute to make training as effective and convenient as possible for our dealers. Please take a moment at the end of the course to fill out the survey.

Sincerely,

FCA Performance Institute
