Subject equipment: Wells Ignition Switches Model Nos. LS1328 and LS1497

1. NHTSA Safety Recall Campaign Number: 14E-021
2. (a) The date notification to purchasers began: April 4, 2014

(b) The date notification of purchasers was completed: The Company has completed the field recovery notification described in its Part 573 report.
3. The total number of items of equipment involved: As explained in its Part 573 report, the Company's field recovery effort is directed to unsold switches that may remain in its customers' inventory. As also described in that report, the Company's Model Nos. LS1328 and LS1497 switches that were installed by consumers and remain in the field will be the subject of the ongoing recall by General Motors.
4. Total number inspected and remedied: During the quarter ending July 31, 2014, and through August 18, 2014, a total of 5,103 Model LS1328 switches and 9 Model LS1497 switches have been returned to the Company by customers as a result of the field recovery effort.
5. Numbers of items of equipment determined to be unreachable: The Company expects to continue to receive switches from customers as a result of its field recovery effort.
