

October 2015

Dealer Service Instructions for:

Safety Recall P41 / NHTSA 14V-438

Ignition Switch

Models

2005 - 2007 (WK) Jeep® Grand Cherokee

2006 - 2007 (XK) Jeep® Commander

IMPORTANT: Some of the involved vehicles may be in dealer used vehicle inventory. Dealers should complete this recall service on these vehicles before retail delivery. Dealers should also perform this recall on vehicles in for service. Involved vehicles can be determined by using the VIP inquiry process.

Subject

The ignition switch on about 640,000 of the above vehicles may experience an unintended change in ignition switch position while driving. This may result in a loss of engine power, power steering assist, power brake assist or disable the airbag function. Disabling one or more of the vehicle's safety features could increase the risk of vehicle occupant injury during a crash and/or cause a crash without warning.

Repair

The ignition switch and lock cylinder must be replaced.

SPECIAL NOTE: To prevent any misunderstandings about the modification performed to the vehicle, be sure to explain to the customer the new process to turn the ignition off (push and turn).

Parts Information

<u>Part Number</u>	<u>Description</u>
CBXTP411AA	Ignition Cylinder/Lock Package

Each package contains the following components:

<u>Quantity</u>	<u>Description</u>
1	Cylinder, Lock
5	Tumbler, #1 size
5	Tumbler, #2 size
5	Tumbler, #3 size
5	Tumbler, #4 size
2	Pin, Lock Cylinder
2	Spring, Lock Cylinder Spring
11	Springs, Tumbler
1	Grease, Tumbler

Each dealer to whom vehicles in the recall were assigned will receive enough Ignition Cylinder/Lock Packages to service about 20% of those vehicles.

<u>Part Number</u>	<u>Description</u>
CBXTP412AA	Switch, Ignition

<u>Part Number</u>	<u>Description</u>
CBXTP413AA	Label, “Push and Turn”

NOTE: One of each of the above parts must be ordered to repair each involved vehicle.

Parts Return

No parts return required for this campaign.

Special Tools

No special tools are required to perform this service procedure.

Service Procedure

1. Disconnect the negative battery cable from battery.
 2. Using a plastic trim stick, carefully remove and save the ignition switch bezel (Figure 1).
- NOTE: The ignition switch bezel snaps off.**
3. Remove and save the silencer pad (two screws) (Figure 2).
 4. Remove and save the knee blocker (Figure 2).

Figure 1 – Ignition Switch Bezel

Figure 2 – Silencer Pad and Knee Blocker

Service Procedure (Continued)

5. Using a T20 TORX® bit, remove and save the two key cylinder housing retaining screws (Figure 3).

6. Remove and save the instrument panel bezel (Figure 4 or Figure 5).

Figure 3 – Key Cylinder Housing Retaining Screws

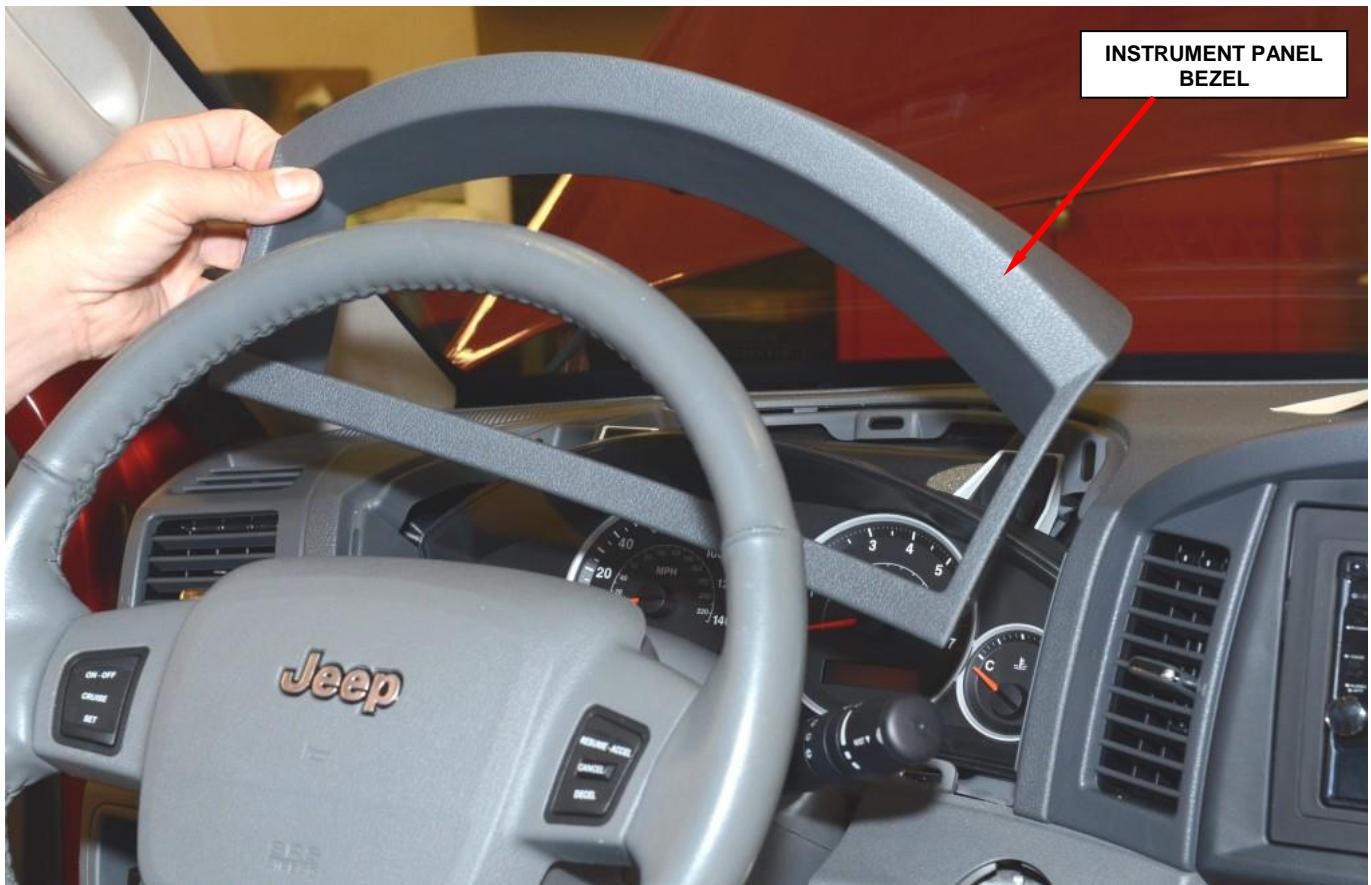

Figure 4 – WK Instrument Panel Bezel

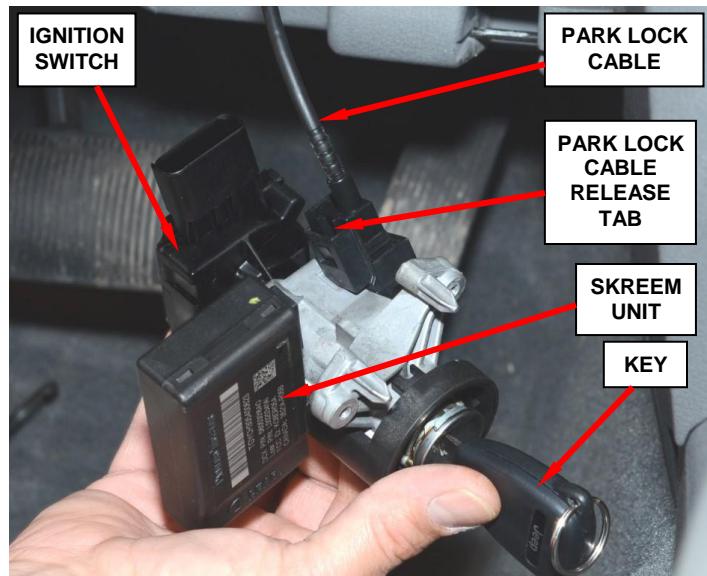

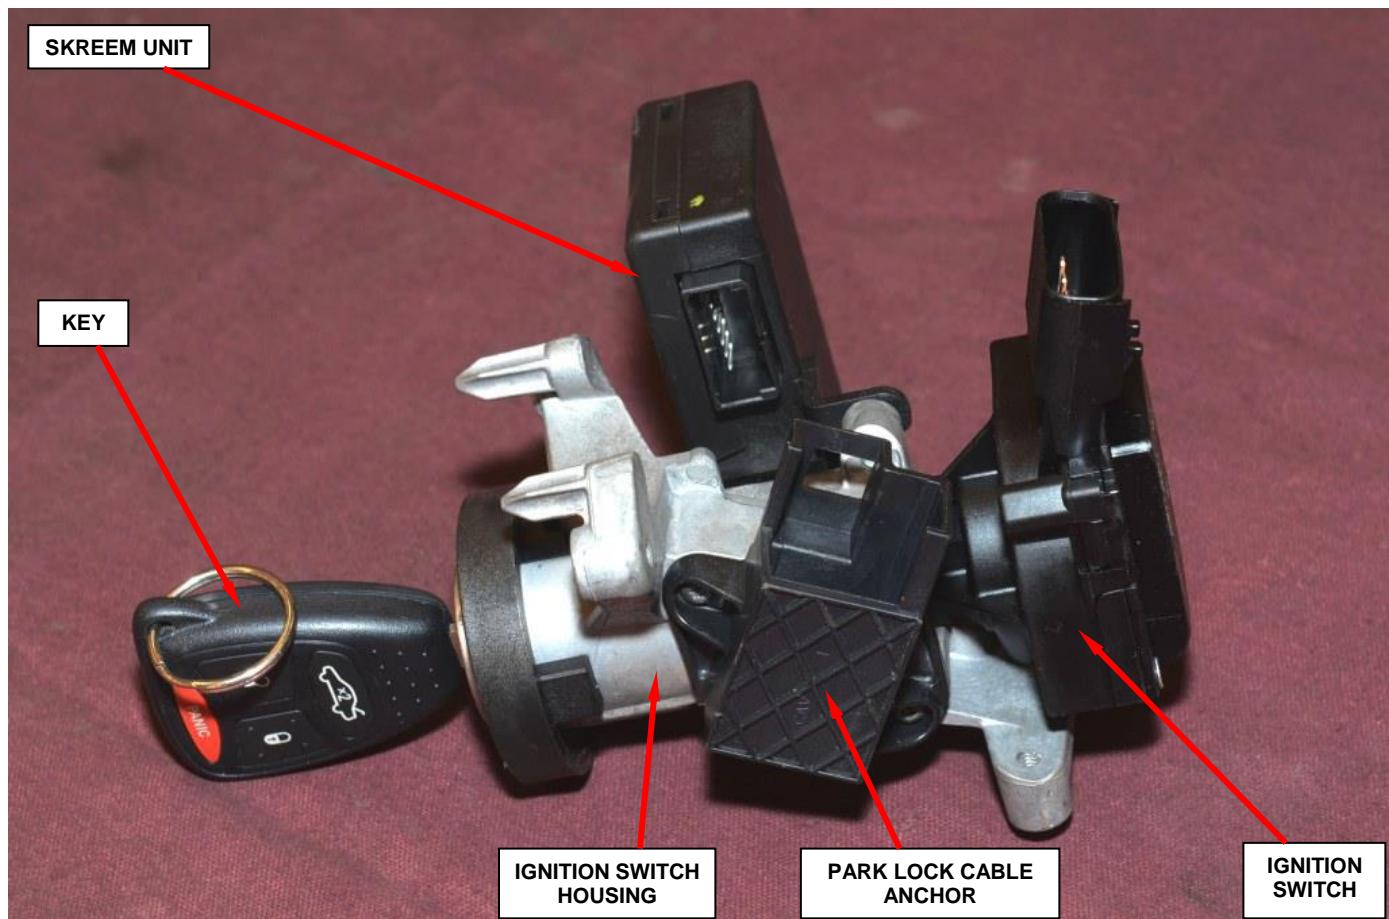

Service Procedure (Continued)**Figure 5 – XK Instrument Panel Bezel**

7. Using a T20 TORX® bit, remove and save the one key cylinder housing retaining screw (Figure 6).
8. Carefully lower the key cylinder housing assembly and disconnect two electrical connectors (one at ignition switch and one at Sentry Key REmote Entry Module [SKREEM]).

**Figure 6 – Third Key Cylinder Retaining Screw Location**

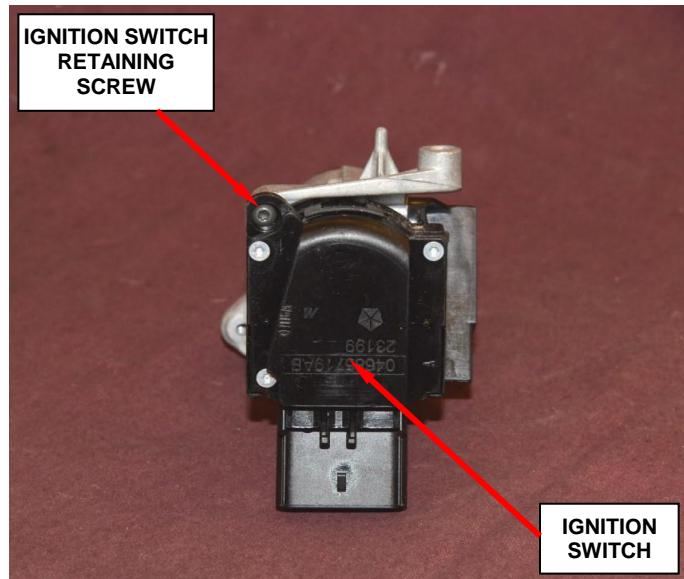

Service Procedure (Continued)

9. With the key in the ignition and in the “RUN” position, press the park lock cable release tab and disconnect the cable from the key cylinder assembly (Figure 7).
10. Place the ignition key cylinder assembly on a clean work bench (Figure 8).
11. Remove and save the SKREEM unit from switch housing (Figure 8).

**Figure 7 – Park Lock Cable Release Tab****Figure 8 – Ignition Key Cylinder Assembly**

Service Procedure (Continued)

12. Using a T10 TORX® bit, remove and save the one ignition switch retaining screw from the ignition switch housing (Figure 9).

13. Using needle nose pliers, simultaneously press in the two ignition switch release tabs and remove the original ignition switch by pulling the ignition switch from the ignition switch housing (Figure 10).

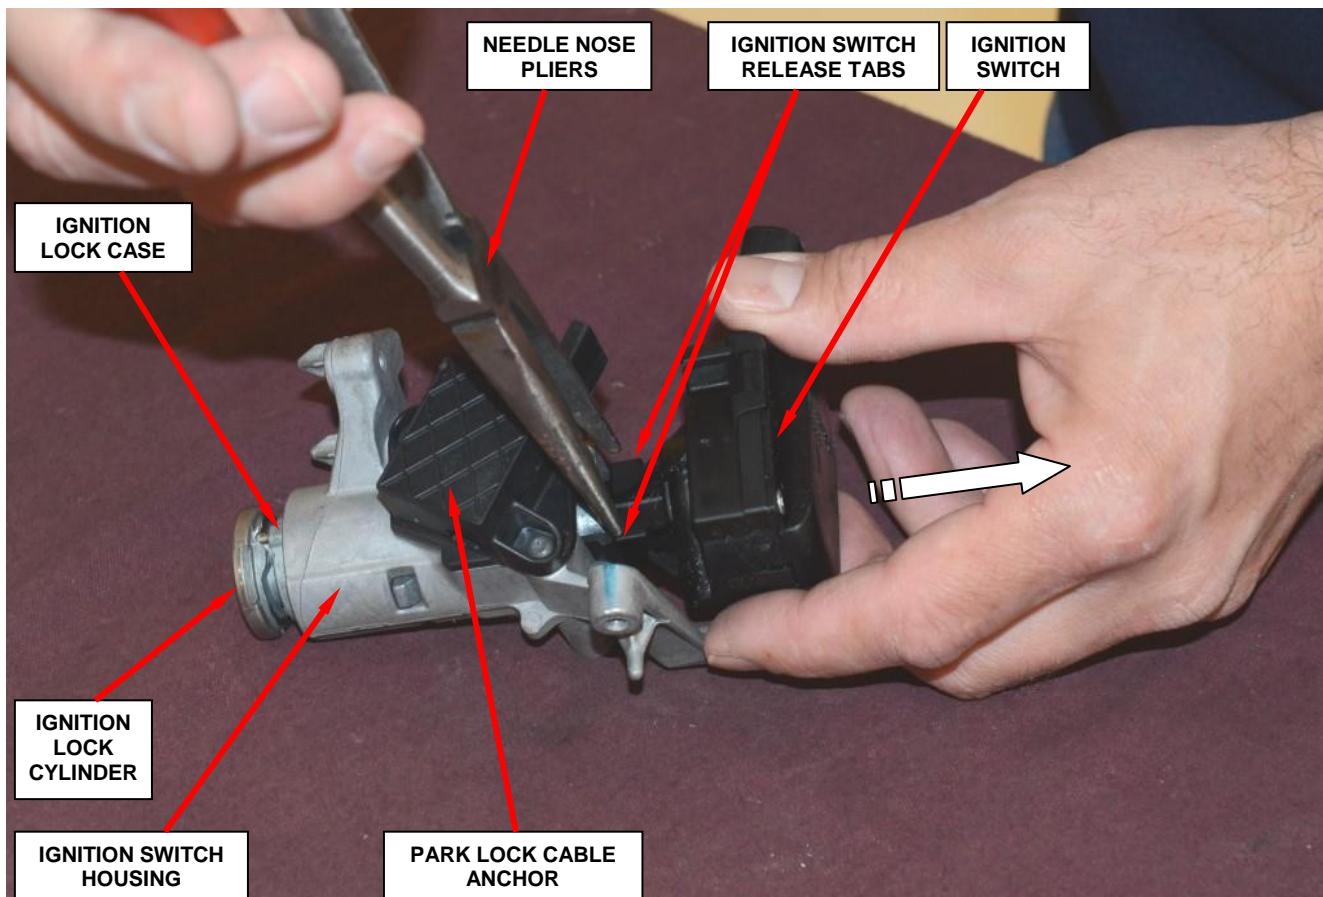

Figure 10 – Ignition Switch Removal

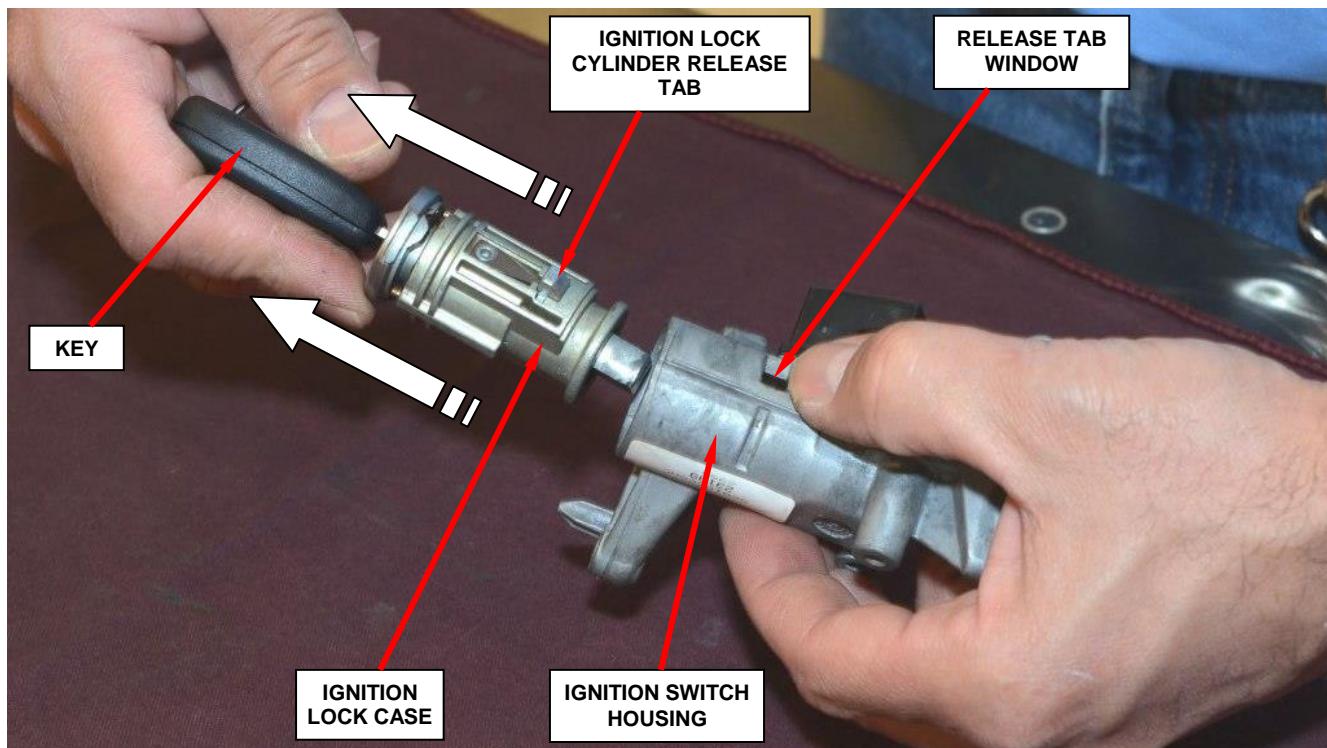

Service Procedure (Continued)

Figure 11 – Remove Original Key Lock Cylinder from Ignition Switch Housing

14. Remove and discard the original key lock cylinder from the ignition switch housing by rotating the key to the “ON” position. Then press on the release tab and pull the ignition lock case out of the ignition switch housing (Figure 11).
15. Use the following procedure to determine the key code for the vehicle.
 - a. Log onto DealerCONNECT.
 - b. Select the “Service” tab.
 - c. In the “Repair Information” box select “Key Code”.
 - d. Enter the vehicle VIN number.
 - e. Select “Reason Code” number 2 “Lock/Replacement Key”.
 - f. Enter password.
 - g. Check the small box in the disclaimer box.
 - h. Select “Search”.
 - i. Write down the key code information for future reference.

Service Procedure (Continued)

16. Use the following procedure to code the tumblers for the new lock cylinder to the original vehicle key:

- a. Using the key code obtained in Step 15 of this procedure, use the Key Code-to-Tumbler Code chart (pages 17 through 32) in this document to determine the correct tumbler code. Write down the tumbler code for future reference.
- b. Using the tumbler code obtained in Step 16a., layout the tumblers as shown in Figure 12.

NOTE: The tumblers in the kit are in plastic bags labeled 1 through 4. Also the tumblers are stamped with a number 1 through 4.

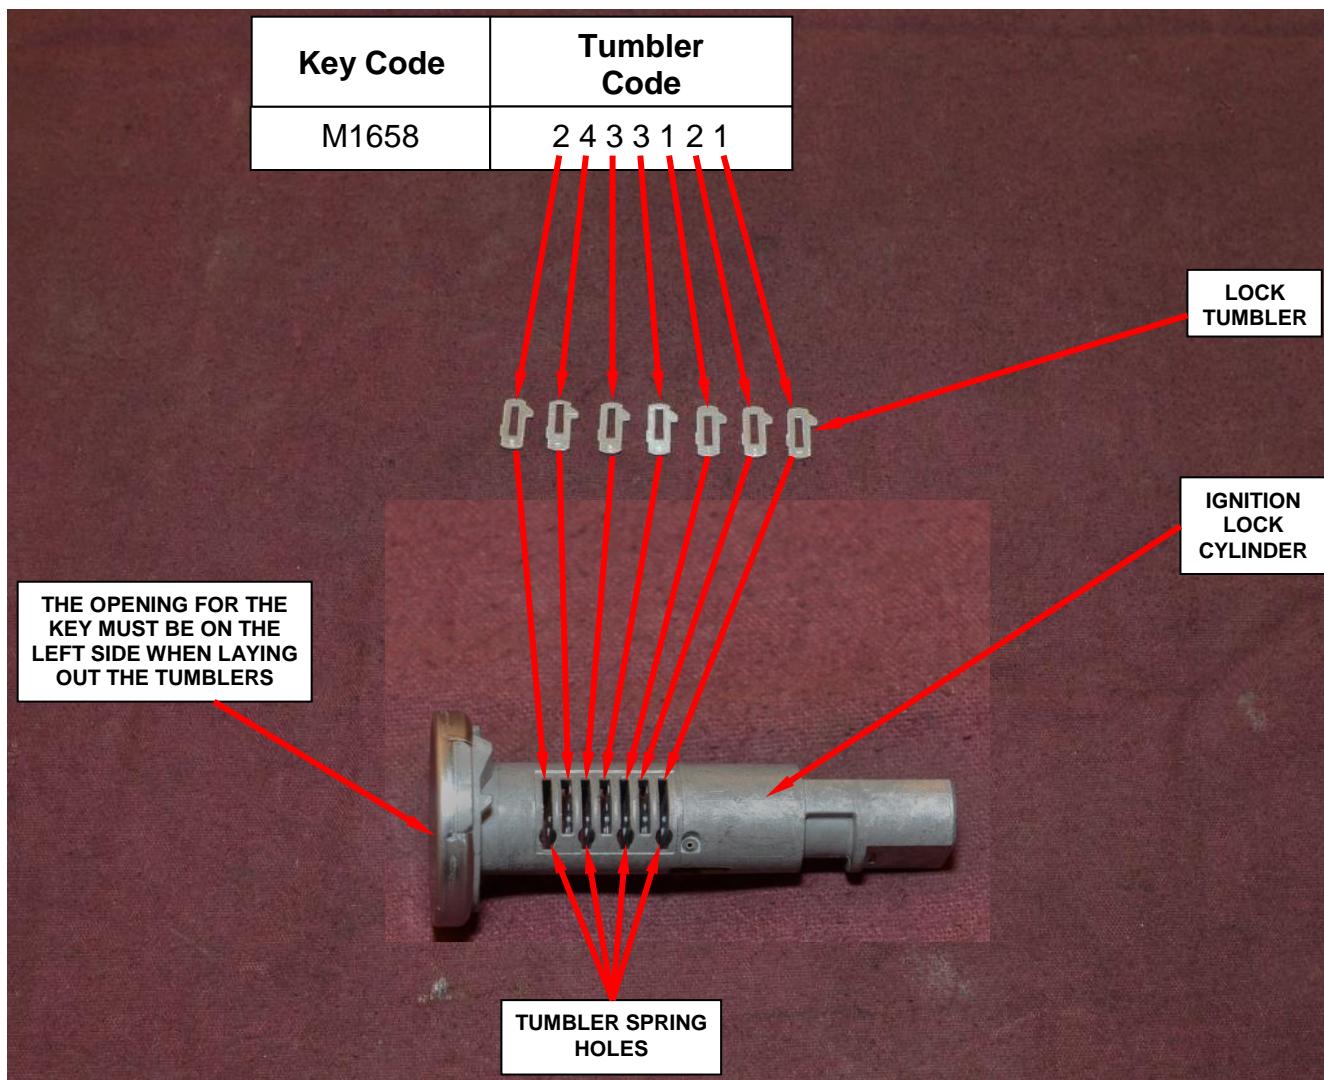

Figure 12 – Determining Correct Tumblers and Locations

Service Procedure (Continued)

- c. Place a tumbler spring into the ignition lock cylinder slot hole closest to the key side of the ignition lock cylinder (Figure 13).

NOTE: The kit contains extra tumbler springs in case one is lost and/or damaged during installation.

- d. Insert the correct tumbler for the first tumbler slot (Figure 13).

CAUTION: Do not force the tumbler into the ignition lock cylinder. Use a rocking motion to engage the tumbler into the ignition lock cylinder. When the tumbler is properly installed it will not come out and is spring loaded.

NOTE: The kit contains extra tumblers in order to accommodate all tumbler codes. The extra tumblers can be discarded or saved for future repairs.

- e. Rotate the ignition lock cylinder $\frac{1}{2}$ turn and install a tumbler spring into the second ignition lock cylinder slot hole.

- f. Insert the correct tumbler for the next tumbler slot.

CAUTION: Do not force the tumbler into the housing. Use a rocking motion to engage the tumbler into the ignition lock cylinder. When the tumbler is properly installed it will not come out and is spring loaded.

- g. Repeat Steps 16e. and 16f. until all seven lock tumblers have been installed into the ignition lock cylinder.

17. Push the spring-loaded tumblers into the ignition lock cylinder and insert the ignition key into the ignition lock cylinder.

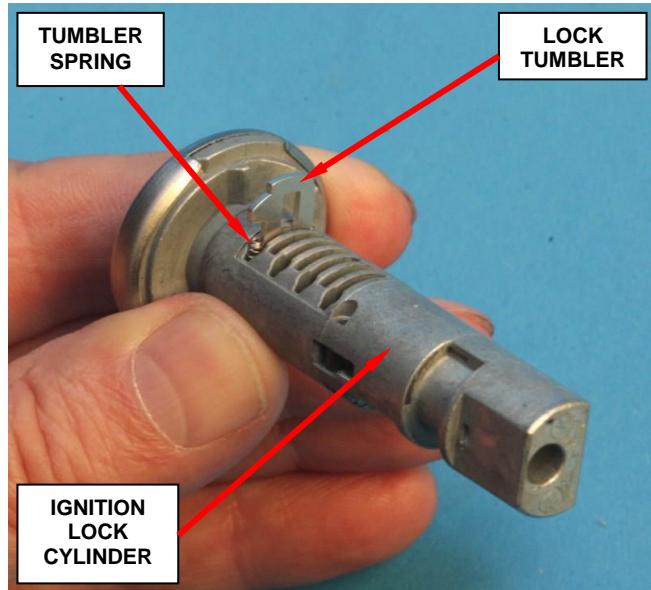

Figure 13 – Tumbler and Spring Installation

Service Procedure (Continued)

18. Use the following procedure to test fit the ignition lock cylinder into the lock cylinder (Figure 14):
- Insert the ignition lock cylinder into the key cylinder (no detent springs or pin installed).
 - Turn the ignition lock cylinder from stop-to-stop while it is inserted into the key cylinder:
 - If there is **no binding** while turning the ignition lock cylinder, continue with Step 20 of this procedure.
 - If there is any **binding** while turning the ignition lock cylinder, continue with Step 19 of this procedure.

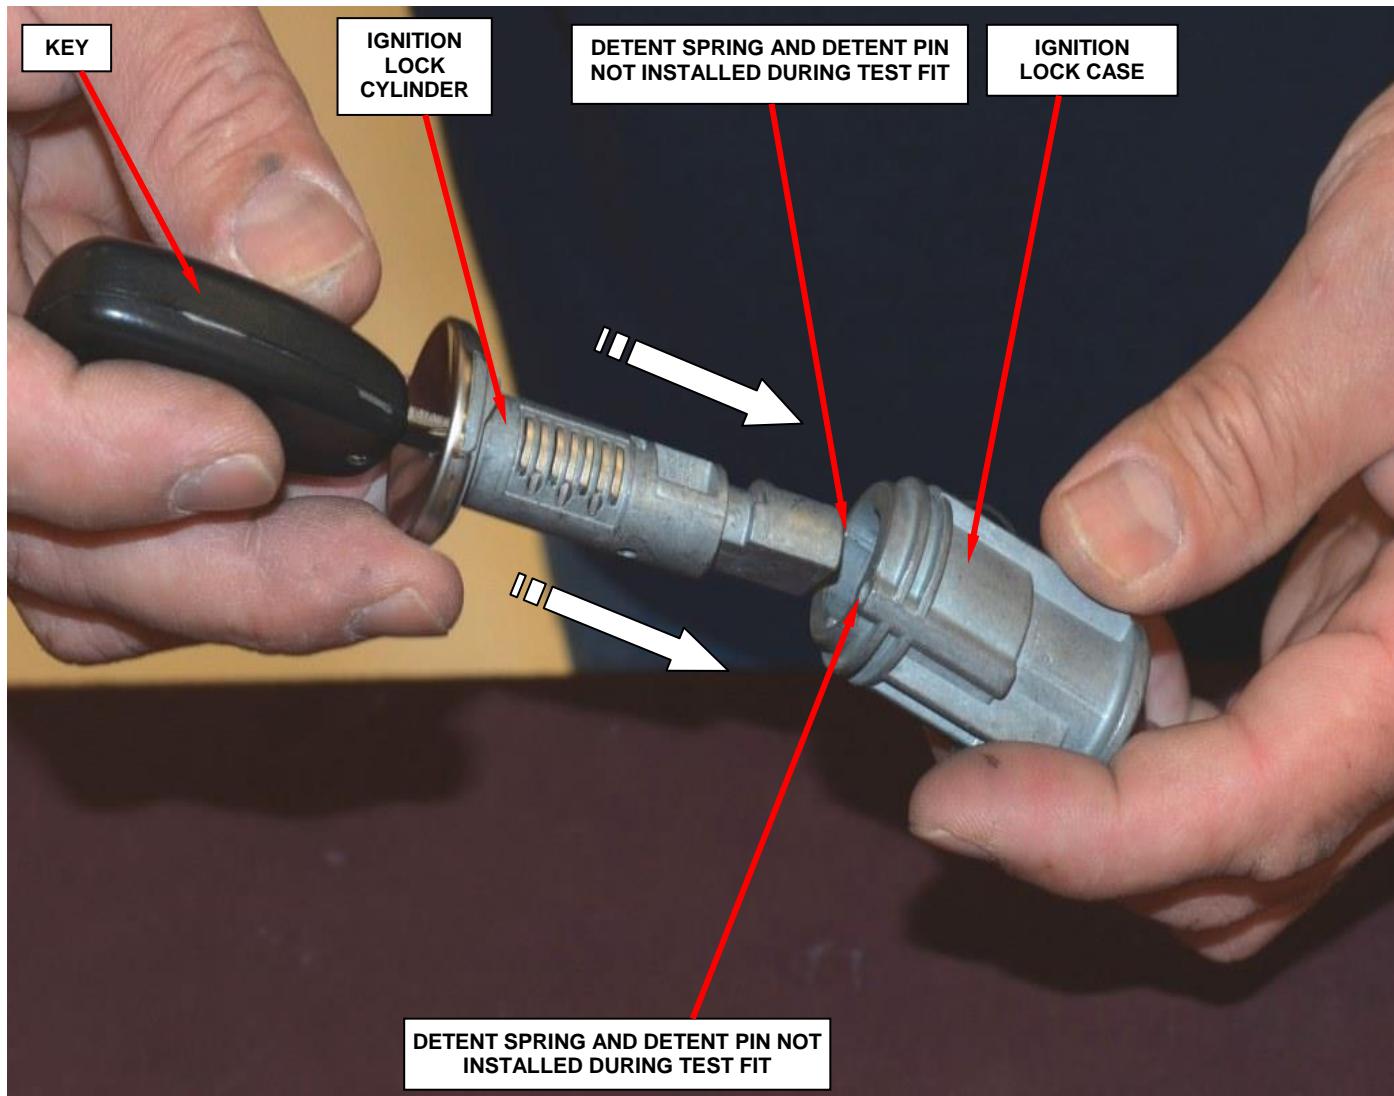

Figure 14 – Insert Ignition lock cylinder into Lock Cylinder (without Detent Springs and Pins) and Check for Binding

Service Procedure (Continued)

19. Use the following procedure to eliminate any binding of the ignition lock cylinder in the ignition lock case:
 - a. Remove the ignition lock cylinder from the ignition lock case.
 - b. Verify that the correct lock tumblers have been installed.
 - c. Verify that the key was cut correctly.
 - d. Verify that the key is not bent, excessively worn or damaged.

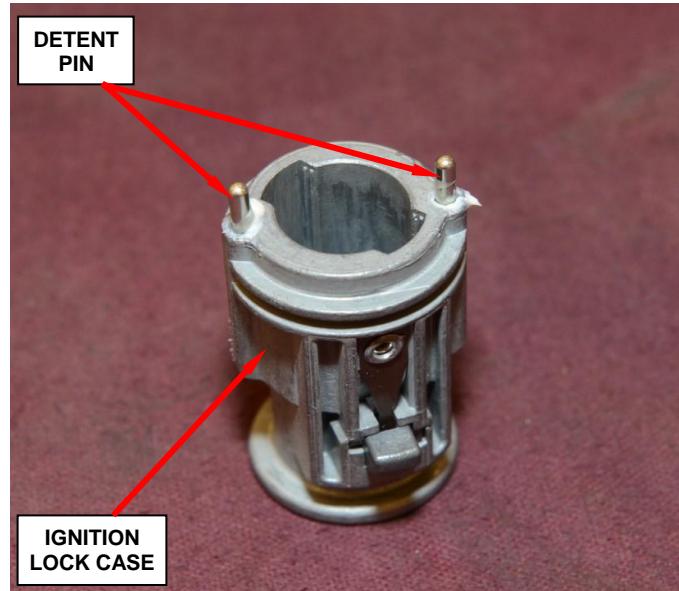

NOTE: If a damaged key(s) is found, the cost of key(s) replacement is the customer's responsibility.

- e. Test fit the ignition lock cylinder in the ignition lock case. **There should be absolutely no binding** when turning the ignition lock cylinder. If binding is still present, repeat Step 19 of this procedure.

CAUTION: Be sure that there is no binding when turning the ignition lock cylinder in the ignition lock case. If there is binding, determine the cause and correct the condition. The ignition lock cylinder cannot be assembled until the binding condition has been identified and the cause corrected.

Service Procedure (Continued)

20. Remove the ignition lock cylinder from the ignition lock case.

21. Apply grease to the detent springs and detent pins (Figure 15).

Figure 15 – Install Detent Springs and Pins

22. Install the two detent springs and pins into the ignition lock case (Figure 15).

23. Apply the provided grease to the ignition lock cylinder tumblers and the inside of the ignition lock case (Figure 16).

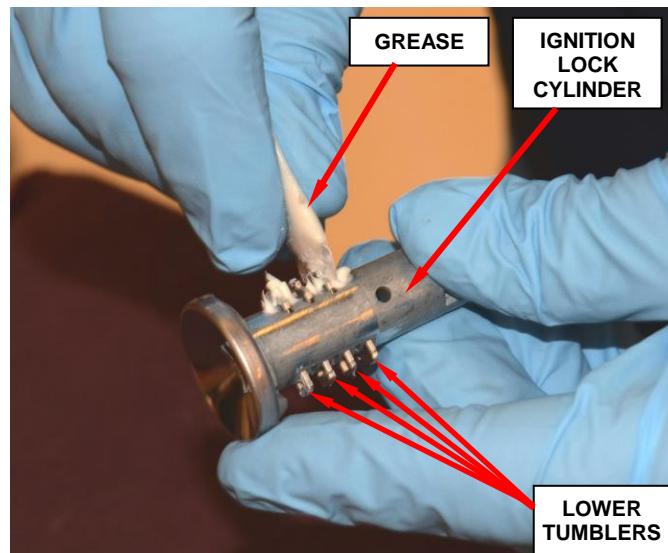

Figure 16 – Grease Tumblers and Ignition Lock Cylinder

Service Procedure (Continued)

24. With the ignition key in the ignition lock cylinder, insert the assembly into the ignition lock case. Turn the ignition lock cylinder clockwise to the key stop (Figure 17).

NOTE: The first time the ignition lock cylinder is turned to the key stop, it will require extra effort to get past the detent pins. Verify that the “Push to Turn” feature is functioning properly.

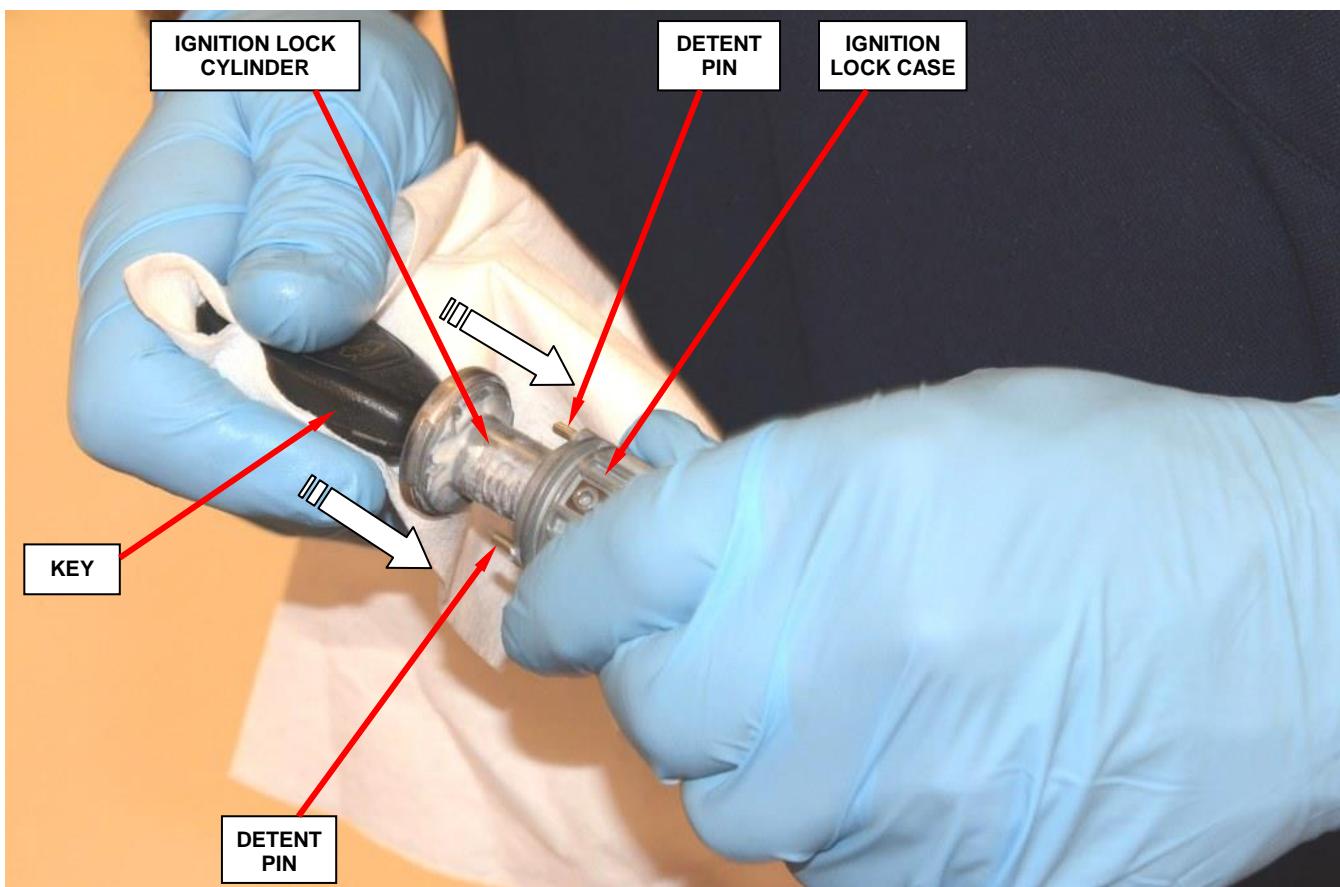

Figure 17 – Insert Ignition Lock Cylinder into the Ignition Lock Case

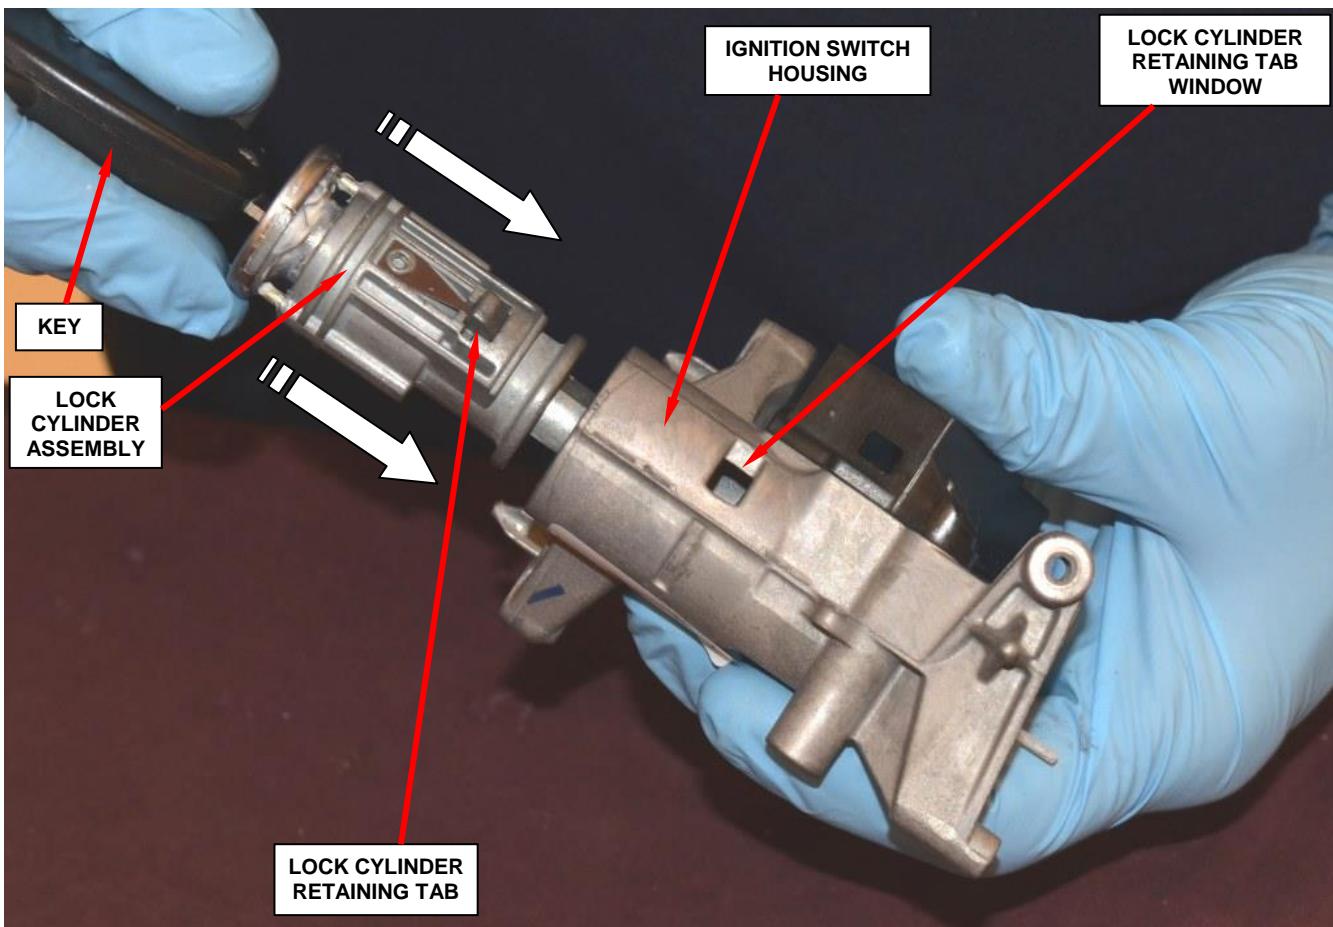

Service Procedure (Continued)

Figure 18 – Insert Key Lock Cylinder into Lock Housing

25. Rotate the key to the “ON” position (lock cylinder retaining tab on side of ignition lock case can now be depressed) (Figure 18).
26. Insert the lock cylinder assembly into the ignition switch housing (Figure 18).
27. Push the new ignition switch onto the back of the ignition switch housing until the two retaining tabs snap into place.
28. Using a T10 TORX® bit, install the ignition switch retaining screw.
29. Install the SKREEM module onto the key cylinder assembly.

Service Procedure (Continued)

30. Test the function of the ignition lock assembly by rotating the key to all positions. **Verify that there is no binding when turning the ignition key. Correct any binding condition if present before installing the ignition lock assembly into the vehicle.**
31. Use the following procedure to install the ignition lock assembly into the vehicle:
 - a. With the key in the ignition and in the “RUN” position, insert the park lock cable into the key cylinder assembly.
 - b. Connect two electrical connectors (one at ignition switch and one at Sentry Key REmote Entry Module [SKREEM]).
 - c. Place the key cylinder housing assembly into position in the instrument panel.
 - d. Using a T20 TORX® bit, install the three key cylinder housing screws.
 - e. Install the instrument panel bezel.
 - f. Install the knee blocker.
 - g. Install the silencer pad (two screws).
 - h. Install the ignition switch bezel.
32. Connect the negative battery cable to the negative battery post.

Service Procedure (Continued)

Figure 19 – “Push and Turn” Label Installation Location

33. Install the “Push and Turn” label in the location shown in Figure 19.

34. Return the vehicle to the customer.

SPECIAL NOTE: To prevent any misunderstandings about the ignition switch modification performed to the vehicle, explain the new process to turn the ignition off (push and turn) to the customer.

Completion Reporting and Reimbursement

Claims for vehicles that have been serviced must be submitted on the DealerCONNECT Claim Entry Screen located on the Service tab. Claims submitted will be used by FCA to record recall service completions and provide dealer payments.

Use the following labor operation numbers and time allowances:

Replace ignition switch and lock cylinder (**WK models**)

Replace ignition switch and lock cylinder (**XK models**)

<u>Labor Operation Number</u>	<u>Time Allowance</u>
23-P4-11-82	0.8 hours
23-P4-11-83	0.9 hours

Add the cost of the recall parts package plus applicable dealer allowance to your claim.

NOTE: See the Warranty Administration Manual, Recall Claim Processing Section, for complete recall claim processing instructions.

Dealer Notification

To view this notification on DealerCONNECT, select “Global Recall System” on the Service tab, then click on the description of this notification.

Owner Notification and Service Scheduling

All involved vehicle owners known to FCA are being notified of the service requirement by first class mail. They are requested to schedule appointments for this service with their dealers. A generic copy of the owner letter is attached.

Enclosed with each owner letter is an Owner Notification postcard to allow owners to update our records if applicable.

Vehicle Lists, Global Recall System, VIP and Dealer Follow Up

All involved vehicles have been entered into the DealerCONNECT Global Recall System (GRS) and Vehicle Information Plus (VIP) for dealer inquiry as needed.

GRS provides involved dealers with an updated VIN list of their incomplete vehicles. The owner's name, address and phone number are listed if known. Completed vehicles are removed from GRS within several days of repair claim submission.

To use this system, click on the “Service” tab and then click on “**Global Recall System.**” Your dealer’s VIN list for each recall displayed can be sorted by: those vehicles that were unsold at recall launch, those with a phone number, city, zip code, or VIN sequence.

Dealers must perform this repair on all unsold vehicles before retail delivery. Dealers should also use the VIN list to follow up with all owners to schedule appointments for this repair.

Recall VIN lists may contain confidential, restricted owner name and address information that was obtained from the Department of Motor Vehicles of various states. Use of this information is permitted for this recall only and is strictly prohibited from all other use.

Additional Information

If you have any questions or need assistance in completing this action, please contact your Service and Parts District Manager.

IMPORTANT SAFETY RECALL

P41 / NHTSA 14V-438

This notice applies to your vehicle (VIN: xxxxxxxxxxxxxxxxxx).

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain **2005 through 2007 model year Jeep® Grand Cherokee vehicles and 2006 and 2007 model year Jeep® Commander vehicles.**

The problem is...

The ignition switch on your vehicle may experience an unintended change in ignition switch position while driving. This may result in a loss of engine power, power steering assist, power brake assist or disable the airbag function. Disabling one or more of the vehicle's safety features could increase the risk of vehicle occupant injury during a crash and/or cause a crash without warning

What your dealer will do...

FCA will repair your vehicle free of charge. To do this, your dealer will replace the ignition switch and lock cylinder. The work will take about one hour to complete. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety...

Simply contact your Chrysler, Jeep, Dodge or RAM dealer right away to schedule a service appointment. Ask the dealer to hold the parts for your vehicle or to order them before your appointment. Please bring this letter with you to your dealer.

If you need help...

If you have questions or concerns which your dealer is unable to resolve, please contact the FCA Group Recall Assistance Center at either recalls.mopar.com or 1-800-853-1403.

Please help us update our records by filling out the attached prepaid postcard if any of the conditions listed on the card apply to you or your vehicle. If you have further questions go to recalls.mopar.com.

If you have already experienced this specific condition and have paid to have it repaired, you may visit www.fcarecallreimbursement.com to submit your reimbursement request online or you can mail your original receipts and proof of payment to the following address for reimbursement consideration: **FCA Customer Assistance, P.O. Box 21-8004, Auburn Hills, MI 48321-8007, Attention: Recall Reimbursement.** Once we receive and verify the required documents, reimbursement will be sent to you within 60 days. If you've had previous repairs and/or reimbursement you may still need to have the recall repair performed on your vehicle.

If your dealer fails or is unable to remedy this defect without charge and within a reasonable time, you may submit a written complaint to the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Ave., S.E., Washington, DC 20590, or you can call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to safercar.gov.

We're sorry for any inconvenience, but we are sincerely concerned about your safety. Thank you for your attention to this important matter.
