Recall Number and Description: **14C03 - Front Seat Back Frame Replacement**

What is the Issue? On your vehicle, it may be possible that the front driver and/or passenger seatback assemblies were produced with sub-standard welds. A sub-standard weld joint may separate and result in noise in the seatback or a loose or leaning seatback. Also, sub-standard welds may not meet the requirements of FMVSS 207, potentially increasing the risk of injury in certain crashes.
