

VIN (Vehicle Identification Number) Range

Begin : NR

End : NR

 Not sequential VINs**Description of Defect :**

Description of the Defect : Some vehicles may experience front airbag, side curtain airbag, and seatbelt pretensioner inadvertent deployments.

Description of the Safety Risk : Airbags that unexpectedly deploy increase the possibility of a crash and risk of injury.

Description of the Cause : The inadvertent airbag deployments are the result of an electrical over-stress to one of two Application Specific Integrated Circuits that control the airbag squibs. The cause of the electrical over-stress has yet to be determined and is actively under investigation.

Identification of Any Warning that can Occur : Customer complaints have indicated, in many instances, that the airbag warning lamp and/or chime are activated shortly before an inadvertent airbag deployment.

Supplier Identification :**Component Manufacturer**

Name : TRW Automotive

Address : 24175 Research Drive

Farmington Hills FOREIGN STATES 48335-2642

Country : NR

Chronology :

Please see attached supplemental information titled "Chrysler Group LLC Chronology R06".

Description of Remedy :

Description of Remedy Program : Chrysler will replace the ORC module software, free of charge. Chrysler has a longstanding policy and practice of reimbursing owners who have incurred the cost of repairing a problem that subsequently becomes the subject of a field action. To ensure consistency, Chrysler, as part of the owner letter, will request that customers send the original receipt and/or other adequate proof of payment to the company for confirmation of the expense.

How Remedy Component Differs from Recalled Component : Replacement ORC modules are being developed that utilize the next generation of electrical architecture for ORC modules, including a revision to the positioning of the Safing Sensor. These next generation ORC modules do not have a history of IAD.

Identify How/When Recall Condition was Corrected in Production : N/A
