Description of Defect:

Description of the Defect: On May 18, 2015, Takata submitted a 573 Safety Defect Information Report to

NHTSA, "Takata has determined that a defect related to motor vehicle safety may arise in some of the subject inflators. The batwing-shaped propellant wafers in some of the subject inflators may experience an alteration over time, which could potentially lead to over-aggressive combustion in the event of an air bag deployment. Depending on the circumstances, this potential condition could create excessive internal pressure when the air bag is deployed, which could result in the body of the inflator rupturing upon deployment."

FMVSS 1:NR FMVSS 2:NR

Description of the Safety Risk: Per Takata's May 18, 2015 573 Safety Defect Information Report (15E-040), "in the event of an inflator rupture, metal fragments could pass through the air bag

cushion material, which may result in injury or death to vehicle occupants."

Description of the Cause: Based upon Takata's May 18, 2015 573 Safety Defect Information Report (15E-040),

"investigation to date, the potential for such ruptures may occur in some of the subject inflators after several years of exposure to persistent conditions of high

absolute humidity."

Chronology:

Please see attached supplemental information titled "FCA US LLC Chronology (15V-313) Takata PSDI-4 061015".

Description of Remedy:

Description of Remedy Program: FCA US LLC ("FCA US") will conduct a voluntary safety recall on all affected vehicles to replace the front driver airbag inflator.

> FCA US has a longstanding policy and practice of reimbursing owners who have incurred the cost of repairing a problem that subsequently becomes the subject of a field action. To ensure consistency, FCA US, as part of the owner letter, will request that customers send the original receipt and/or other adequate proof of payment to the company for confirmation of the expense.

How Remedy Component Differs from Recalled Component: At this time, the remedy component has yet to be determined.
