 Not sequential VINs**Description of Noncompliance :**

Description of the Noncompliance : The GVWR on the hitch head is 15,500 and is less than the GVWR on the Federal Certification Label

FMVSS 1 : 567 - Certification

FMVSS 2 : NR

Description of the Safety Risk : There is little safety risk the deviation is from 440 pounds to 635 pounds depending on the model.

Description of the Cause : There was a clerical error in calculating the GVWR based on the GAWR and Hitch Weight. The sum was used instead of the limiting GVWR of the hitch head at 15,500 pounds

Identification of Any Warning that can Occur : It is not likely that there would be any noticeable stress on the hitch head.

Country : NR

**Chronology :**

We were informed by a dealer on or about 7/20/2015 of the difference between the label on the hitch head indicating the GVWR and the Federal Certification Tag GVWR. Upon review we realized that in the process of doing a re-weigh of certain floor plans the error was made.

**Description of Remedy :**

Description of Remedy Program : Forest River will send a new set of labels to the customer and dealer depending on if the unit is retailed or not. We will have instructions as to the cleaning of the surface and installation of the labels. If the customer feel that they would rather have the dealer put on the labels it will be done at no charge to the customer, the dealer will be reimbursed for his time under our warranty program.

How Remedy Component Differs from Recalled Component : There will be no distinguishing difference between the recall and remedy on the units.

Identify How/When Recall Condition was Corrected in Production : The database was corrected on 7/24/2015. all units that are labeled from this date will have the correct GVWR.

**Recall Schedule :**

Description of Recall Schedule : We will submit to R.L. Polk for a currant owner and address as soon as we obtain a recall number. It is usually 10 days for us to obtain the listing.
