Production Dates : SEP 29, 2015 - NOV 02, 2015

VIN (Vehicle Identification Number) Range

Begin : 4V0TC3220GB028020

End : 4V0TC3226GB028121

 Not sequential VINs**Description of Defect :**

Description of the Defect : The vehicles subject to this recall were manufactured with 4400# axles and the Federal ID Label specifies 5200# axles

FMVSS 1 :NR

FMVSS 2 :NR

Description of the Safety Risk : The retail owner could overload the vehicle and exceed the GVWR. Overloading the vehicle could result in a loss of control causing an accident.

Description of the Cause : The wrong axles were installed on the production line.

Identification of Any Warning that can Occur : None

Supplier Identification :

Component Manufacturer

Name : NR

Address : NR

NR

Country : NR

Chronology :

The proto-type model was built with 4400# axles. It was determined at that time 5200# axles could be installed on future models and a PCN was created and issued. A change in personnel resulted in failure to distribute the PCN to production. The non-compliance was discovered during an internal audit conducted by Quality Control and Engineering.

Description of Remedy :

Description of Remedy Program : NR

How Remedy Component Differs from Recalled Component : Replace the 4400# axles with 5200# axles at no charge to the customer.

Identify How/When Recall Condition was Corrected in Production : 5200# axles were installed on units in the yard and on the production line.

Recall Schedule :

Description of Recall Schedule : All vehicles will be repaired on the dealer's lot prior to first retail sale. Formal notification will not be required; all dealers have been contacted & remedies will be complete by 11/30/15.
